
UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended September 30, 2007

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the transition period from _____ to _____

Commission file number 1-11294

Unum Group

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

62-1598430

(I.R.S. Employer Identification No.)

1 Fountain Square

Chattanooga, Tennessee 37402

(Address of principal executive offices)

423.294.1011

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

(Check one): Large Accelerated Filer Accelerated Filer Non-accelerated Filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

360,830,497 shares of the registrant's common stock were outstanding as of September 30, 2007.

Signatures	75

Cautionary Statement Regarding Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 provides a “safe harbor” to encourage companies to provide prospective information, as long as those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those included in the forward-looking statements. We desire to take advantage of these safe harbor provisions. Certain information contained in this discussion, or in any other written or oral statements made by us in communications with the financial community or contained in documents filed with the Securities and Exchange Commission (SEC), may be considered forward-looking. Forward-looking statements are those not based on historical information, but rather relate to future operations, strategies, financial results, or other developments and speak only as of the date made. These statements may be made directly in this document or may be made part of this document by reference to other documents filed by us with the SEC, which is known as “incorporation by reference.” You can find many of these statements by looking for words such as “will,” “may,” “should,” “could,” “believes,” “expects,” “anticipates,” “estimates,” “intends,” “projects,” “goals,” “objectives,” or similar expressions in this document or in documents incorporated herein.

These forward-looking statements are subject to numerous assumptions, risks, and uncertainties, many of which are beyond our control. We caution readers that the following factors, in addition to other factors mentioned from time to time, may cause actual results to differ materially from those contemplated by the forward-looking statements:

- General economic or business conditions, both domestic and foreign, may be less favorable than expected, which may affect premium levels, claims experience, the level of pension benefit costs and funding, and investment results, including credit deterioration of investments.
- Competitive pressures in the insurance industry may increase significantly through industry consolidation or otherwise.
- Events or consequences relating to terrorism and acts of war, both domestic and foreign, may adversely affect our business and the Company’s results of operations in a period and may also affect the availability and cost of reinsurance.
- Legislative, regulatory, or tax changes, both domestic and foreign, may adversely affect the businesses in which we are engaged.
- Actual experience in connection with implementation of the multistate market conduct regulatory settlement agreements and the California Department of Insurance settlement agreement may deviate from our assumptions.
- Rating agency actions, state insurance department market conduct examinations and other inquiries, other governmental investigations and actions, and negative media attention may adversely affect our business and the Company’s results of operations in a period.
- The level and results of litigation and rulings in the multidistrict litigation or other purported class actions may not be favorable to the Company and may adversely affect our business and the Company’s results of operations in a period.
- Investment results, including, but not limited to, realized investment losses resulting from impairments, may differ from our assumptions and prior experience and may adversely affect our business and the Company’s results of operations in a period.
- Changes in the interest rate environment may adversely affect our reserve and policy assumptions and ultimately profit margins and reserve levels.
- Sales growth may be less than planned, which could affect adversely revenue and profitability.
- Effectiveness in supporting new product offerings and providing customer service may not meet expectations.
- Actual experience in pricing, underwriting, and reserving may deviate from our assumptions.
- Actual persistency may be lower than projected persistency, resulting in lower than expected revenue and higher than expected amortization of deferred acquisition costs.

[Table of Contents](#)

- Incidence and recovery rates may be influenced by, among other factors, the rate of unemployment and consumer confidence, the emergence of new diseases, epidemics, or pandemics, new trends and developments in medical treatments, the effectiveness of risk management programs, and implementation of the multistate regulatory settlement agreements and the California Department of Insurance settlement agreement.
- Insurance reserve liabilities may fluctuate as a result of changes in numerous factors, and such fluctuations can have material positive or negative effects on net income.
- Retained risks in our reinsurance operations are influenced primarily by the credit risk of the reinsurers and potential contract disputes. Any material changes in the reinsurers' credit risk or willingness to pay according to the terms of the contract may adversely affect our business and the results of operations in a period.

For further discussion of risks and uncertainties which could cause actual results to differ from those contained in the forward-looking statements, see Part I, Item 1A of our annual report on Form 10-K for the year ended December 31, 2006.

All subsequent written and oral forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. We do not undertake any obligation to release publicly any revisions to such forward-looking statements to reflect events or circumstances after the date of this document or to reflect the occurrence of unanticipated events.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Unum Group and Subsidiaries

September 30, 2007

Note 1 - Basis of Presentation

The accompanying consolidated financial statements of Unum Group and its subsidiaries (the Company) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. For further information, refer to the consolidated financial statements and footnotes included in our annual report on Form 10-K for the year ended December 31, 2006.

During the first quarter of 2007, we closed the sale of our wholly-owned subsidiary GENEX Services, Inc. (GENEX). The financial results of GENEX are reported as discontinued operations in the consolidated financial statements. Except where noted, the information presented in the notes to the consolidated financial statements excludes GENEX. See Note 3 for further discussion.

In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2007, are not necessarily indicative of the results that may be expected for the year ended December 31, 2007.

Note 2 - Accounting Pronouncements

Accounting Pronouncements Adopted:

Effective January 1, 2007, we adopted the provisions of Statement of Position 05-1 (SOP 05-1), *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*. SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs (DAC) on internal replacements of insurance and investment contracts other than those specifically described in Statement of Financial Accounting Standards No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*.

An internal replacement is defined as a modification in product benefits, features, or coverages that occurs by the exchange or replacement of an existing insurance policy for a new policy. If the modification does not substantially change (as defined by SOP 05-1) the policy, we retain the unamortized DAC from the original policy and amortize its remaining balance over the expected life of the new policy, and the costs of replacing the policy are accounted for as policy maintenance costs and expensed as incurred. If the internal replacement results in a policy that is substantially changed, we account for the replacement as an extinguishment of the original policy and the issuance of a new policy. Unamortized DAC on the original policy that was replaced is immediately expensed, and the costs of acquiring the new policy are capitalized and amortized in accordance with our accounting policies for DAC.

The cumulative effect of applying the provisions of SOP 05-1 decreased our 2007 opening balance of retained earnings \$445.2 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2007

Note 2 - Accounting Pronouncements - Continued

Effective January 1, 2007, we adopted the provisions of Financial Accounting Standards Board Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes, an interpretation of Statement of Financial Accounting Standards No. 109 (SFAS 109)*. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS 109. Unlike SFAS 109, FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Additionally, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The cumulative effect of applying the provisions of FIN 48 increased our 2007 opening balance of retained earnings \$22.7 million.

Effective January 1, 2007, we adopted the provisions of Statement of Financial Accounting Standards No. 155 (SFAS 155), *Accounting for Certain Hybrid Financial Instruments, an amendment of Statement of Financial Accounting Standards Nos. 133 (SFAS 133) and 140 (SFAS 140)*. SFAS 155:

(a) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; (b) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133; (c) establishes a requirement to evaluate beneficial interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; (d) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and, (e) eliminates restrictions on a qualifying special-purpose entity's ability to hold passive derivative financial instruments that pertain to beneficial interests that are or contain a derivative financial instrument. The adoption of SFAS 155 did not have a material effect on our financial position or results of operations.

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123 (revised 2004) (SFAS 123(R)), *Share-Based Payment*, which is a revision to Statement of Financial Accounting Standards No. 123 (SFAS 123), *Accounting for Stock-Based Compensation*. SFAS 123(R) focuses primarily on accounting for transactions in which an entity obtains employee service in exchange for share-based payments. Under SFAS 123(R), share-based awards that do not require future service (i.e., vesting awards) are expensed immediately. Share-based employee awards that require future service are amortized over the relevant service period. We adopted SFAS 123(R) using the modified prospective transition method. In accordance with the modified prospective transition method, the provisions are generally applied only to share-based awards granted subsequent to adoption. Prior to adoption of SFAS 123(R), the unrecognized compensation cost related to nonvested stock awards was reported as additional paid-in capital and deferred compensation, a contra equity account. The value of this contra equity account at the adoption of SFAS 123(R) was \$13.8 million. The adoption of SFAS 123(R) did not have a material effect on our financial position or results of operations.

Accounting Pronouncement Outstanding:

Statement of Financial Accounting Standards No. 157 (SFAS 157), *Fair Value Measurements*, was issued in September 2006. SFAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. We will adopt the provisions of SFAS 157 effective January 1, 2008. The adoption of SFAS 157 will not have a material effect on our financial position or results of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - (Continued)

Unum Group and Subsidiaries

September 30, 2007

Note 3 - Discontinued Operations

As discussed in Note 1, the sale of GENEX closed effective March 1, 2007, and we recognized an after-tax gain of \$6.2 million on the sale. We intend to continue to purchase certain disability management services for a period of up to five years from the effective date of the sale. The cost of the services to be purchased was negotiated in an arms-length transaction. Intercompany amounts paid to GENEX for these types of services were \$2.3 million for the two month period ended February 28, 2007, and \$4.1 million and \$11.8 million for the three and nine month periods ended September 30, 2006. The estimated future cost of purchases of these services is not significant to our results of operations.

GENEX was accounted for as an asset held for sale at December 31, 2006. The results of GENEX, which were previously reported in the Other segment, are reported as discontinued operations and excluded from segment results for all periods shown.

Selected results for GENEX are as follows:

	<u>Three Months</u>	<u>Nine Months</u>

As a result of the sale of GENEX, we froze the pension plan benefits for the employees of GENEX during the first quarter of 2007, which resulted in the recognition of a curtailment loss of \$0.2 million and a \$7.2 million reduction in our pension liability. The curtailment loss was comprised of a \$0.6 million increase in our pension liability related to a termination benefit and a \$0.4 million recognition of unamortized prior service credits. As of the date of the curtailment, we remeasured our U.S. pension plan obligation. The weighted average discount rate assumption used in the measurement of our U.S. pension plan benefit obligation changed from 6.10 percent as of our December 31, 2006 measurement date to 5.90 percent as of the measurement date of March 1, 2007. No other assumptions were materially changed. As a result of the remeasurement, our pension plan liability increased \$35.6 million. The net effect of the curtailment and remeasurement was an increase in our pension plan liability of \$29.0 million, a decrease in deferred income tax of \$10.1 million, a decrease in income from discontinued operations of \$0.2 million, and a decrease in accumulated other comprehensive income of \$18.7 million.

Unum Group and Subsidiaries

September 30, 2007

Note 5 - Pensions and Other Postretirement Benefits - Continued

In the third quarter of 2007, we terminated the Canadian defined benefit pension plans which were frozen in 2004. The termination of these plans did not have a material effect on our financial position or results of operations.

We have no regulatory contribution requirements for our U.S. qualified defined benefit plan in 2007; however, we elected to make voluntary contributions of \$110.0 million during the second quarter of 2007. For our U.K. operation, which maintains a separate defined benefit plan, we made required contributions totaling \$2.6 million and \$7.7 million for the third quarter and first nine months of 2007, respectively.

Note 6 - Debt

In May 2004, Unum Group issued 12.0 million 8.25% adjustable conversion-rate equity security units (units) in a private offering for \$300.0 million. We subsequently registered the privately placed securities for resale by the private investors. Each unit had a stated amount of \$25 and initially consisted of (a) a contract pursuant to which the holder agreed to purchase, for \$25, shares of Unum Group's common stock on May 15, 2007 and which entitled the holder to contract adjustment payments at the annual rate of 3.165 percent, payable quarterly, and (b) a 1/40 or 2.5 percent ownership interest in a senior note issued by Unum Group due May 15, 2009 with a principal amount of \$1,000, on which Unum Group paid interest at the initial annual rate of 5.085%, payable quarterly.

The scheduled remarketing of the senior note element of the units issued in May 2004 occurred in February 2007, as stipulated by the terms of the original offering, and we reset the interest rate on \$300.0 million of senior notes due May 15, 2009 to 5.859%. We purchased \$150.0 million of the senior notes in the remarketing which were subsequently retired. The associated write-off of deferred debt costs decreased first quarter of 2007 income by \$2.4 million before tax, or \$1.6 million after tax. In May 2007, we settled the purchase contract element of the units by issuing 17.7 million shares of common stock. We received proceeds of approximately \$300.0 million from the transaction.

During the first nine months of 2007, we made principal payments of \$15.0 million on our senior secured non-recourse variable rate notes due 2036 which were issued by Tailwind Holdings, LLC.

During the second quarter of 2007, we purchased \$34.5 million aggregate principal amount of our outstanding 6.85% notes due 2015. The costs associated with this debt reduction decreased our second quarter 2007 income approximately \$0.8 million before tax, or \$0.6 million after tax.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued**Unum Group and Subsidiaries****September 30, 2007****Note 7 - Stockholders' Equity and Earnings Per Common Share**

Net income (loss) per common share is determined as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006	2007	2006
(in millions of dollars, except share data)				
Numerator				
Net Income (Loss)	\$ 187.0	\$ (63.7)	\$ 518.8	\$ 134.9
Denominator (000s)				
Weighted Average Common Shares - Basic	359,741.2	340,727.7	350,665.9	319,209.4
Dilution for the Purchase Contract Element of the Adjustable Conversion-Rate Equity Security Units	—	—	2,230.6	9,868.5
Dilution for Assumed Exercises of Stock Options and Other Dilutive Securities	1,165.1	—	1,213.0	2,234.6
Weighted Average Common Shares - Assuming Dilution	<u>360,906.3</u>	<u>340,727.7</u>	<u>354,109.5</u>	<u>331,312.5</u>
Net Income (Loss) Per Common Share				
Basic	\$ 0.52	\$ (0.19)	\$ 1.48	\$ 0.42
Assuming Dilution	\$ 0.52	\$ (0.19)	\$ 1.46	\$ 0.41

We use the treasury stock method to account for the effect of the purchase contract element of the units, outstanding stock options, and nonvested stock awards on the computation of dilutive earnings per share. Under this method, these potential common shares will each have a dilutive effect, as individually measured, when the average market price of Unum Group's common stock during the period exceeds the threshold appreciation price of the purchase contract element of the units, the exercise price of the stock options, or the grant price of the nonvested stock awards. The purchase contract element of the units issued in 2004 and 2003 had a threshold appreciation price of \$16.95 per share and \$13.27 per share, respectively. We settled the purchase contract element of the 2004 and 2003 units in May 2007 and 2006 and issued 17.7 million and 43.3 million shares of common stock, respectively. The outstanding stock options have exercise prices ranging from \$12.23 to \$58.56, and the nonvested stock awards have grant prices ranging from \$19.18 to \$27.18.

In computing earnings per share assuming dilution, only potential common shares that are dilutive (those that reduce earnings per share) are included. Potential common shares are not used when computing earnings per share assuming dilution if the result would be antidilutive, such as when a net loss is reported. For the three month period ended September 30, 2006, approximately 0.9 million issuable shares related to the purchase contract elements of the units and approximately 2.3 million issuable common shares for the assumed exercise of stock options and other dilutive securities were not used in the calculation of earnings per share due to the antidilutive effect when a net loss is reported.

Potential common shares not included in the computation of dilutive earnings per share because their impact would be antidilutive based on current market prices approximated 6.1 million and 6.3 million shares of common stock for the three and nine month periods ended September 30, 2007, and 8.2 million and 8.3 million common shares for the three and nine month periods ended September 30, 2006.

Unum Group has 25,000,000 shares of preferred stock authorized with a par value of \$0.10 per share. No preferred stock has been issued to date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2007

Note 8 - Income Tax

The cumulative effect of applying the provisions of FIN 48 as of January 1, 2007 resulted in a \$22.7 million decrease in our liability for unrecognized tax benefits, net of associated deferred tax assets. The balance in our liability for unrecognized tax benefits as of January 1, 2007 and September 30, 2007 was \$67.4 million and \$126.1 million, respectively. Included at January 1, 2007 and September 30, 2007 are liabilities of approximately \$19.2 million and \$21.7 million, respectively, that if recognized, would impact our effective tax rate. The total increase in unrecognized tax benefits is \$56.7 million and \$58.7 million for the three and nine month periods ended September 30, 2007, respectively.

We recognize interest expense and penalties related to unrecognized tax benefits in tax expense. The total amount of accrued interest and penalties in the consolidated balance sheets as of January 1, 2007 and September 30, 2007 is \$5.5 million and \$8.2 million, respectively. The interest expense and penalties related to unrecognized tax expense in the consolidated statements of operations are \$1.0 million and \$2.7 million for the three and nine month periods ended September 30, 2007, respectively.

We file federal and state income tax returns in the United States and in foreign jurisdictions. We are under continuous examination by the Internal Revenue Service (IRS) with regard to our U.S. federal income tax returns. The current IRS examination covers our tax years 2002 through 2004. Tax years subsequent to 2004 remain subject to examination by tax authorities in all major jurisdictions.

We believe it is reasonably possible that within the next 12 months a foreign subsidiary's tax return for tax year 2005 will either be accepted without examination or will be examined and closed, resulting in a reduction in our liability for unrecognized tax benefits of as much as \$6.6 million.

We believe sufficient provision has been made for all proposed and potential adjustments for all years that are not closed by the statute of limitations in all major tax jurisdictions and that any such adjustment would not have a material adverse effect on our financial position, liquidity, or results of operations. However, it is possible that the resolution of a proposed adjustment by a taxing authority could impact our results of operations in a future period.

Note 9 - Commitments and Contingent Liabilities

We are a defendant in a number of litigation matters. In some of these matters, no specified amount is sought. In others, very large or indeterminate amounts, including punitive and treble damages, are asserted. There is a wide variation of pleading practice permitted in the United States courts with respect to requests for monetary damages, including some courts in which no specified amount is required and others which allow the plaintiff to state only that the amount sought is sufficient to invoke the jurisdiction of that court. Further, some jurisdictions permit plaintiffs to allege damages well in excess of reasonably possible verdicts. Based on our extensive experience and that of others in the industry with respect to litigating or resolving claims through settlement over an extended period of time, we believe that the monetary damages asserted in a lawsuit or claim bear little relation to the merits of the case, or the likely disposition value. Therefore, the specific monetary relief sought is not stated.

The lawsuits described below are for the most part in very preliminary stages, and the outcome of the matters is uncertain. An estimated loss is accrued when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Unless indicated otherwise, reserves have not been established for these matters.

Note 9 - Commitments and Contingent Liabilities - Continued

Claims Handling Matters

Multidistrict Litigation

On September 2, 2003, the Judicial Panel on the Multidistrict Litigation entered an order transferring more than twenty putative class actions and derivative suits, described below, filed in various courts against the Company, several of its subsidiaries, and some of our officers, to the U.S. District Court for the Eastern District of Tennessee for coordinated or consolidated pretrial proceedings. The defendants strongly deny the allegations in each of these actions and will vigorously defend the substantive and procedural aspects of the litigations, except as noted below with respect to settlement discussions.

Shareholder Derivative Actions

On November 22, 2002, the first of five purported shareholder derivative actions was filed in the Tennessee Chancery Court. Between December 27, 2002 and March 11, 2003, four additional purported derivative actions were filed in state and federal courts in Tennessee. The defendants removed each of the actions that were filed in Tennessee state court to the U.S. District Court for the Eastern District of Tennessee.

Each of these actions purports to be brought on behalf of the Company against certain current and past members of our Board of Directors and certain executive officers alleging breaches of fiduciary duties and other violations of claims paying law by defendants. Plaintiffs allege, among other things, that the individual defendants breached their duties of good faith and loyalty by establishing or permitting to be established an unlawful policy of denying legitimate disability claims and improper financial reporting, and that certain defendants engaged in insider trading.

The district court consolidated these actions under the caption In re UnumProvident Corporation Derivative Actions. The plaintiffs then filed a single consolidated amended complaint. We deny the allegations of the complaint and will vigorously contest them.

Federal Securities Law Class Actions

On February 12, 2003, the first of six virtually identical putative securities class actions was filed in the U.S. District Court for the Eastern District of Tennessee, later consolidated under the caption In re UnumProvident Corp. Securities Litigation.

The Lead Plaintiff filed a consolidated amended complaint alleging claims under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 on behalf of a putative class of purchasers of UnumProvident stock between March 30, 2000 and April 24, 2003. The amended complaint alleges, among other things, that we issued misleading financial statements, improperly accounted for certain impaired investments, failed to properly estimate our disability claim reserves, and pursued certain improper claims handling practices.

On July 30, 2007, we entered into a Stipulation of Settlement with the plaintiffs to resolve the litigation. Under the terms of the settlement, which is subject to, among other things, approval by the court, we have agreed to pay \$40.0 million to settle all claims that were or could have been asserted by the class in the action. After the receipt of insurance proceeds, the net cost to us was \$11.6 million before tax and was included in our second quarter of 2007 operating results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2007

Note 9 - Commitments and Contingent Liabilities - Continued

Policyholder Class Actions

On July 15, 2002, Rombeiro v. Unum Life Insurance Company of America, et al., was filed in the Superior Court of California and subsequently was removed to federal court, alleging that the plaintiff was wrongfully denied disability benefits under a group long-term disability plan. On January 21, 2003, an Amended Complaint was filed on behalf of a putative class of individuals that were denied or terminated from benefits under group long-term disability plans, seeking injunctive and declaratory relief and payment of benefits. On April 30, 2003, the court granted in part and denied in part the defendants' motion to dismiss the complaint. On May 14, 2003, the plaintiff filed a Second Amended Complaint seeking similar relief.

Between November 2002 and November 2003, six additional similar putative class actions were filed in (or later removed to) federal district courts in Illinois, Massachusetts, New York, Pennsylvania, and Tennessee. The complaints alleged that the putative class members' claims were evaluated improperly and allege that the Company and its insurance subsidiaries breached certain fiduciary duties owed to the class members under the Employee Retirement Income Security Act (ERISA), Racketeer Influenced Corrupt Organizations Act (RICO), and/or various state laws. The complaints sought various forms of equitable relief and money damages, including punitive damages.

These actions all were transferred to the Eastern District of Tennessee multidistrict litigation. On December 22, 2003, the Tennessee Federal District Court entered an order consolidating all of the above actions for all pretrial purposes under the caption In re UnumProvident Corp. ERISA Benefit Denial Actions, and appointed a lead plaintiff. A consolidated amended complaint was filed on February 20, 2004.

Court ordered mediation has concluded with the settlement of all individual claims brought by seven of the fifteen named plaintiffs. An eighth plaintiff has subsequently resolved her claims through the process established under the regulatory settlement agreements.

On September 4, 2007, the District Court certified a (b)(2) class consisting of "all plan participants and beneficiaries insured under ERISA governed long-term disability insurance policies/plans issued by UnumProvident and the insuring subsidiaries of UnumProvident throughout the United States who have had a long-term disability claim denied, terminated, or suspended on or after June 30, 1999 by UnumProvident or one or more of its insuring subsidiaries after being subjected to any of the practices alleged in the complaint." The Company has filed a petition with the Sixth Circuit Court of Appeals seeking leave to appeal the certification order now, without awaiting rulings on the merits of the claims. The class as certified seeks, among other forms of relief, an opportunity to have denied or terminated claims re-assessed by so-called independent reviewers. The court has yet to rule on pending motions by the Company for judgment on the pleading, or for summary judgment.

On April 30, 2003, a separate putative class action, Taylor v. UnumProvident Corporation, et al., was filed in the Tennessee Circuit Court and subsequently removed to federal court. The complaint alleges claims against UnumProvident and certain subsidiaries on behalf of a putative class of long-term disability insurance policyholders who did not obtain their coverage through employer sponsored plans and who had a claim denied, terminated, or suspended by a UnumProvident subsidiary after January 1, 1995, seeking equitable and monetary relief. Plaintiff alleges that the defendants violated various state laws by engaging in unfair claim practices and improperly denying claims.

The court subsequently granted in part our motion for summary judgment in Taylor, dismissing plaintiff's request for equitable relief on her breach of contract claim and dismissing any claim plaintiff may make for punitive damages under the Tennessee Consumer Protection Act. The former claim is the principal claim upon which class

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2007

Note 9 - Commitments and Contingent Liabilities - Continued

certification is sought. The court reserved ruling on the remainder of the pending motion for summary judgment pending further mediation of the Taylor action.

Plan Beneficiary Class Actions

During the first quarter of 2007, we executed a settlement agreement resolving the plan beneficiary class action, or 401(k) Retirement Plan case, entitled *Gee v. UnumProvident Corporation, et al.* The settlement agreement, the net cost of which is immaterial, is subject to notice to the proposed settlement class and Court approval following a fairness hearing. On September 19, 2007, the Court granted preliminary approval of the settlement and ordered that notice be sent to the proposed settlement class. A fairness hearing is scheduled for December 19, 2007.

Examinations and Investigations

During 2004 and 2005, certain of our insurance subsidiaries entered into settlement agreements with various regulators related to disability claims handling practices. The agreements provide for changes in certain of our claims handling procedures and a claim reassessment process available to certain claimants whose claims were denied or closed during specified periods. The agreements will remain in place until the later of January 1, 2007, or the completion of an examination of claims handling practices and an examination of the reassessment process, both of which will be conducted by the lead state regulators. The settlement agreements also provide for a contingent fine of up to \$145.0 million on our U.S. insurance subsidiaries in the event that we fail to satisfactorily meet the performance standards in the settlement agreements relating to the examinations referred to above. The parties to the agreements subsequently agreed to extend the reassessment process until December 31, 2007.

In the first quarter of 2006, we completed an analysis of our assumptions related to the reserves we established for the claim reassessment process. Our analysis was based on preliminary data as of the end of the first quarter of 2006, when actual results to date were considered credible enough to enable us to update our initial expectations of costs related to the reassessment process. We concluded that a change in our initial assumptions, primarily related to the number of claimants for whom payments will continue because the claimant remains eligible for disability payments, was warranted. We based our conclusion and our revised estimate on the information that existed at that time, which was the actual cost related to approximately 20 percent of the projected ultimate total number of claims expected to be reassessed. The characteristics, profile, and cost of those initial 20 percent of claims were more statistically credible than the information on which we based the initial charges in 2004 and 2005. Based on our analysis, in the first quarter of 2006 we recorded a charge of \$86.0 million before tax, or \$55.9 million after tax, to reflect our then current estimate of future obligations for benefit costs for claims reopened in the reassessment.

In the third quarter of 2006, we increased our provision for the cost of the reassessment process \$325.4 million before tax and \$211.5 million after tax based on changes in our emerging experience for the number of decisions being overturned by the reassessment process and the average cost per reassessed claim. The revised third quarter estimate was based on the cost of approximately 55 percent of the projected ultimate total number of claims expected to be reassessed. The third quarter charge was comprised of \$310.4 million to reflect our revised estimate of future obligations for benefit costs for claims reopened in the reassessment and \$15.0 million for additional incremental direct claim reassessment operating expenses because of the additional time now estimated to complete the process. Our best estimate of \$310.4 million for the reopened claims assumed that the nature and characteristics of the approximately 45 percent remaining claims estimated to be reassessed at that time would be similar to the average profile of the 55 percent already reviewed at that time.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2007

Note 9 - Commitments and Contingent Liabilities - Continued

In the second quarter of 2007, we increased our provision for the estimated cost of the claim reassessment process \$53.0 million before tax and \$34.5 million after tax based on changes in our emerging experience for the number of decisions being overturned and the average cost per reassessed claim. The revised second quarter of 2007 estimate was based on the cost of approximately 99 percent of the potential inventory of claim reassessment information forms returned to us, with our claim reassessment on approximately 88 percent of the forms completed at that time. We had not at that time yet finalized our claim reassessment on the remaining forms but had performed a financial review and included that information in our analysis of emerging experience.

We have now substantially completed the claims reassessment process, as required by the regulatory settlement agreements. Any remaining claim reassessment costs will not have a material effect on our financial position or results of operations. The final examination under the multistate regulatory settlement agreement has commenced and is expected to be completed by mid-year 2008. Due to the changes we have made to our claims operations to enhance our oversight functions, we expect to meet the performance standards in the agreements when these examinations are concluded.

Other Claim Litigation

We and our insurance company subsidiaries, as part of our normal operations in managing disability claims, are engaged in claim litigation where disputes arise as a result of a denial or termination of benefits. Most typically these lawsuits are filed on behalf of a single claimant or policyholder, and in some of these individual actions punitive damages are sought, such as claims alleging bad faith in the handling of insurance claims. For our general claim litigation, we maintain reserves based on experience to satisfy judgments and settlements in the normal course. We expect that the ultimate liability, if any, with respect to general claim litigation, after consideration of the reserves maintained, will not be material to our consolidated financial condition. Nevertheless, given the inherent unpredictability of litigation, it is possible that an adverse outcome in certain claim litigation involving punitive damages could, from time to time, have a material adverse effect on our consolidated results of operations in a period, depending on the results of operations for the particular period. We are unable to estimate a range of reasonably possible punitive losses.

From time to time class action allegations are pursued where the claimant or policyholder purports to represent a larger number of individuals who are similarly situated. Since each insurance claim is evaluated based on its own merits, there is rarely a single act or series of actions, which can properly be addressed by a class action. Nevertheless, we monitor these cases closely and defend ourselves appropriately where these allegations are made.

Broker Compensation, Quoting Process, and Related Matters

Examinations and Investigations

Since October 2004, we and/or our insurance subsidiaries have received subpoenas or information requests from a Federal Grand Jury in San Diego, the District Attorney for the County of San Diego, and the U.S. Department of Labor, as well as insurance departments and/or other state regulatory or investigatory agencies of at least seven additional states including Connecticut, Florida, Maine, Massachusetts, North Carolina, South Carolina, and Tennessee. The subpoenas and/or information requests relate to, among other things, compliance with ERISA

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2007

Note 9 - Commitments and Contingent Liabilities - Continued

relating to our interactions with insurance brokers and to regulations concerning insurance information provided by us to plan administrators of ERISA plans, as well as compliance with state and federal laws with respect to quoting processes, producer compensation, solicitation activities, policies sold to state or municipal entities, and information regarding compensation arrangements with brokers. We will continue to cooperate fully with all investigations.

Broker-Related Litigation

We and certain of our subsidiaries, along with many other insurance brokers and insurers, have been named as defendants in a series of putative class actions that have been transferred to the U.S. District Court for the District of New Jersey for coordinated or consolidated pretrial proceedings as part of multidistrict litigation (MDL) No. 1663, In re Insurance Brokerage Antitrust Litigation. The plaintiffs in MDL No. 1663 filed a consolidated amended complaint in August 2005, which alleges, among other things, that the defendants violated federal and state antitrust laws, RICO, ERISA, and various state common law requirements by engaging in alleged bid rigging and customer allocation and by paying undisclosed compensation to insurance brokers to steer business to defendant insurers. Defendants filed a motion to dismiss the complaint on November 29, 2005. On April 5, 2007, defendants' motion to dismiss was granted without prejudice as to all counts except the ERISA counts. Plaintiffs were granted a last opportunity to file an amended complaint, and they did so on May 22, 2007. On June 21, 2007, defendants filed a motion to dismiss and for summary judgment on all counts. On August 31, 2007 and September 28, 2007, plaintiffs' federal antitrust and RICO claims were dismissed with prejudice. Defendants' motion for summary judgment on the ERISA counts is pending. All further discovery in these actions has been stayed pending the resolution of the motion to dismiss and for summary judgment.

We are a defendant in an action styled, Palm Tree Computers Systems, Inc. v. ACE USA, et al., which was filed in the Florida state Circuit Court on February 16, 2005. The complaint contains allegations similar to those made in the multidistrict litigation referred to above. The case was removed to federal court and, on October 20, 2005, the case was transferred to the District of New Jersey multidistrict litigation. A motion to remand the case to the state court in Florida remains pending, but no further action has been taken in the case subsequent to the transfer.

During the first quarter of 2007, we reached an agreement in principle to resolve the claims asserted in the putative derivative action styled Leonard v. UnumProvident Corporation, et al. The proposed settlement, the terms of which are not expected to be material to us, was approved by the court on September 11, 2007.

Miscellaneous Matters

In September 2003, United States of America ex. rel. Patrick J. Loughren v. UnumProvident Corporation and GENEX Services, Inc. was filed in the United States District Court for the District of Massachusetts. This is a qui tam action to recover damages and civil penalties on behalf of the United States of America alleging violations of the False Claims Act by us and our GENEX subsidiary. In accordance with the False Claims Act, the action was originally filed under seal to provide the government the opportunity to investigate the allegations and prosecute the action if they believed that the case had merit and warranted their attention. The government declined to prosecute the case and the case became a matter of public record on December 23, 2004. The complaint alleges that we defrauded the government by inducing and or assisting disability claimants to apply for disability benefits from the Social Security Administration (SSA) when we allegedly knew that the claimants were not disabled under SSA criteria. A motion to dismiss the complaint was unsuccessful. We intend to vigorously defend the action.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) - Continued

Unum Group and Subsidiaries

September 30, 2007

Note 9 - Commitments and Contingent Liabilities - Continued

In May 2007, Roy Mogel, Todd D. Lindsay and Joseph R. Thorley individually and on behalf of those similarly situated v. Unum Life Insurance Company, was filed in the United States District Court for the District of Massachusetts. This is a putative class action alleging that we breached fiduciary duties owed to certain beneficiaries under group life insurance policies when we paid certain life insurance proceeds by establishing interest-bearing Retained Asset Accounts rather than checks. We have filed a motion to dismiss the complaint and believe that the allegations are without merit. We intend to vigorously defend the action.

Summary

Various lawsuits against us, in addition to those discussed above, have arisen in the normal course of business. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning our compliance with applicable insurance and other laws and regulations.

Given the complexity and scope of our litigation and regulatory matters, it is not possible to predict the ultimate outcome of all pending investigations or legal proceedings or provide reasonable estimates of potential losses, except where noted in connection with specific matters. It is possible that our results of operations or cash flows in a particular period could be materially affected by an ultimate unfavorable outcome of pending litigation or regulatory matters depending, in part, on our results of operations or cash flows for the particular period. We believe, however, that the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, should not have a material adverse effect on our financial position.

Note 10 - Subsequent Events

On October 31, 2007, Northwind Holdings, LLC (Northwind Holdings), a newly formed Delaware limited liability company and a wholly-owned subsidiary of Unum Group, issued \$800.0 million of floating rate, insured, senior, secured notes due 2037 in a private offering. The notes bear interest at a floating rate equal to the three month London Interbank Offered Rate (LIBOR) plus 0.78%. Recourse for the payment of principal, interest, and other amounts due on the notes will be dependent principally on the receipt of dividends from Northwind Reinsurance Company (Northwind Re), the sole subsidiary of Northwind Holdings. The ability of Northwind Re to pay dividends to Northwind Holdings will depend on its satisfaction of applicable regulatory requirements and on the performance of the business of The Paul Revere Life Insurance Company, Provident Life and Accident Insurance Company, and Unum Life Insurance Company of America (collectively, the ceding insurers) reinsured by Northwind Re. None of Unum Group, the ceding insurers, Northwind Re, or any other affiliate of Northwind Holdings is an obligor or guarantor on the notes.

On October 31, 2007, we announced our intent to call for an early redemption all \$150.0 million principal amount of our outstanding 7.25% notes scheduled to mature in 2032. We also announced that we intend to offer to purchase up to \$400.0 million aggregate principal amount of other of our outstanding long-term debt.

In October 2007, our board of directors authorized the repurchase of up to \$700.0 million of Unum Group's common stock. The share repurchase program does not have an expiration date, and the pace of repurchase activity, if commenced, will depend upon various factors such as the level of available cash, alternative uses for cash, and our stock price. The authorization may be modified, extended, or terminated by our board of directors at any time.

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders
Unum Group and Subsidiaries

We have reviewed the consolidated balance sheet of Unum Group and subsidiaries as of September 30, 2007, and the related consolidated statements of operations and comprehensive income (loss) for the three-month and nine-month periods ended September 30, 2007 and 2006, and the consolidated statements of stockholders' equity and cash flows for the nine-month periods ended September 30, 2007 and 2006. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

As discussed in Note 2 to the consolidated financial statements, Unum Group changed its method of accounting for deferred acquisition costs and income taxes as of January 1, 2007 in accordance with adoption of Statement of Position 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*, and Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of Statement of Financial Accounting Standards No. 109*.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Unum Group and subsidiaries as of December 31, 2006, and the related consolidated statements of operations, stockholders' equity, and cash flows for the year then ended not presented herein, and in our report dated February 26, 2007, we expressed an unqualified opinion on those consolidated financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

Unum Group, a Delaware general business corporation, and its insurance and non-insurance companies, which collectively with Unum Group we refer to as the Company, operate in the United States, the United Kingdom, and, to a limited extent, in certain other countries around the world. The principal operating subsidiaries in the United States are Unum Life Insurance Company of America (Unum America), Provident Life and Accident Insurance Company (Provident), The Paul Revere Life Insurance Company (Paul Revere Life), and Colonial Life & Accident Insurance Company (Colonial), and in the United Kingdom, Unum Limited. We are the largest provider of group and individual income protection insurance products in the United States and the United Kingdom. We also provide a complementary portfolio of other insurance products, including long-term care insurance, life insurance, employer- and employee-paid group benefits, and other related services.

We have three major business segments: Unum US, Unum UK, and Colonial. Our other segments are the Individual Income Protection – Closed Block segment, the Other segment, and the Corporate segment. These segments are discussed more fully under “Segment Results” included herein in Item 2.

As one of the leading providers of employee benefits, we offer a comprehensive portfolio of products and services to meet the diverse needs of the marketplace. We try to achieve a competitive advantage by offering group, individual, and voluntary workplace products that can be offered as stand alone products or that can be combined with other coverages to provide integrated and individualized product solutions for customers. We offer businesses of all sizes competitive benefit plans to protect the incomes and lifestyles of employees and their families in the event of illness, injury, or death. We believe that our benefit programs can help businesses attract and retain quality employees, reduce the cost of absenteeism, and return employees to work after an illness or injury, thereby creating a more satisfied and productive workforce.

We believe that we are a well positioned and competitive force in our sector. However, due to the nature of our business, we are sensitive to economic and financial market movements, including consumer confidence, employment levels, and the level of interest rates.

This discussion and analysis should be read in conjunction with the consolidated financial statements and notes thereto in Part I, Item 1 contained in this Form 10-Q and with the discussion, analysis, and consolidated financial statements and notes thereto in Part I, Items 1 and 1A, and Part II, Items 6, 7, 7A, and 8 of our annual report on Form 10-K for the year ended December 31, 2006.

Executive Summary

We believe that the actions we have taken during the past several years have improved the effectiveness of the basic functions of our businesses, reduced our business volatility, and led to a greater consistency in the execution of our business plan. Our goal is to build further momentum by focusing on our strengths and serving our customers well.

Our four primary objectives for 2007 have been and continue to be as follows:

- Continue to improve the profitability of our Unum US group income protection line of business;
- Ensure that all of our other product lines and businesses that are performing well continue to do so;
- Continue to execute our capital management strategy; and
- Successful completion of the claim reassessment process in preparation for the regulatory final examination.

In commenting on our results for the third quarter and first nine months of 2007, we will discuss three major topics: operating performance of our three major business segments, our capital management strategy, and our outstanding legal and regulatory issues.

Operating Performance of our Major Business Segments

We reported solid operating results for our Unum US segment for the third quarter of 2007, with an increase in segment operating income of 39.0 percent compared to the prior year third quarter, excluding the third quarter of 2006 increase in our claim reassessment cost estimate. Our primary focus for Unum US during 2007 has been continued improvement of our claims management performance in our group income protection line of business, and we are pleased with the progress made during the first nine months of the year. Our reported group income protection benefit ratio was 92.1 percent for the third quarter of 2007, consistent with the goals we established for improved claim operational effectiveness. Our 2007 priorities also include improved profitability in certain of our supplemental products and the maintenance of current performance levels in our other lines, and our third quarter operating results generally reflect achievement of these priorities. Although our third quarter of 2007 supplemental and voluntary product lines operating income declined 1.9 percent relative to the third quarter of last year, our group life and accidental death and dismemberment product lines improved 30.7 percent. For the first nine months, operating income improved 8.5 percent in 2007 over the prior year in our supplemental and voluntary product lines and 19.3 percent in our group life and accidental death and dismemberment product lines. Positive trends for our Unum US group lines of business include favorable pricing trends, renewal profit improvement, and the management of case persistency. For all of our Unum US lines of business, we are aggressively managing our operating expenses and are continuing to make improvements in our operating effectiveness. Although sales for Unum US for the first nine months of 2007 were lower than 2006, sales in the third quarter of 2007 increased 4.4 percent over the prior year comparable period. We have throughout the year maintained our disciplined pricing, and our overall sales mix continues to be generally in line with our target mix. The number of new accounts in the group core market segment, which we define for Unum US as employee groups with less than 2,000 lives, increased over the prior year first nine months, which we believe is a clear indication of our strong focus in this segment. We anticipate that sales for our group core market segment and our supplemental lines will increase in the fourth quarter of 2007 relative to the prior year fourth quarter. During the third quarter of 2007, Unum US introduced *Simply Unum*, a new product offering and administrative platform designed to better meet the needs of our group core market segment and our voluntary market. The new platform represents substantial changes in existing technologies and workflow processes, from quote and proposal to billing and administration and ultimately to the payment of claims. The initial market rollout was limited to four pilot sales offices, with the full rollout expected to occur during the first quarter of 2008.

Our Unum UK segment continues to produce excellent operating results, with an increase in segment operating income of 43.3 percent for the third quarter of 2007 and 31.9 percent for the first nine months of 2007, as measured in Unum UK's local currency, compared to the comparable periods of 2006. Sales in Unum UK declined in the third quarter of 2007 relative to the prior year, but on a year-to-date basis improved in 2007 relative to the prior year comparable period. This improvement was most apparent in the core market segment, which we now define for Unum UK as employee groups with less than 500 lives. The core market segment reported increases relative to the prior year in both the third quarter and the first nine months of 2007. Changes in pension legislation created a distraction in the market for employee benefits and negatively impacted sales during 2006. However, other U.K. legislative changes that became effective in October 2006 extended the legal retirement age and made it illegal for employers to discriminate on the basis of age, thereby encouraging the extension of insurance coverage. As a result and as expected, Unum UK sales have increased during the first nine months of 2007 relative to the 2006 levels, and we expect this trend to continue throughout the remainder of the year, although to a lesser extent as sales in the fourth quarter of 2006 were positively impacted by the legislative changes. We are focused on increasing market awareness and demand for income protection products in the U.K. market.

Our Colonial segment also had excellent operating results for the third quarter of 2007, with an increase in segment operating income of 20.0 percent compared to the prior year. For the first nine months of 2007, Colonial's segment operating income increased 26.2 percent over the comparable prior year period. Colonial's sales improved in the third quarter and first nine months of 2007, with increases of 2.2 percent and 3.5 percent over the same prior year periods. Most notable were sales increases in the public sector market for educators and in the commercial market segment for employee groups with less than 100 lives. The number of new accounts increased over the prior year first nine months, although the average new case size was smaller than expected. We anticipate that our sales growth will continue to increase year over year during the remainder of 2007, as positive trends have emerged in our agency sales force recruiting and productivity levels and in our targeted market segments. We are focused on

[Table of Contents](#)

maintaining profitable and sustainable sales growth for this segment. During the third quarter of 2007, we introduced a new hospital confinement indemnity insurance plan that gives businesses the opportunity to offer their employees a solution to help fill coverage gaps in their major medical plan and help protect employees against increasing out-of-pocket expenses. In October 2007, we introduced a group limited benefit plan that provides businesses a product offering for their employees who do not have major medical coverage.

Capital Management Strategy

Our capital planning objectives for 2007 were: maintain our risk-based capital (RBC) ratio for our traditional U.S. insurance subsidiaries, calculated on a weighted average basis using the National Association of Insurance Commissioners (NAIC) Company Action Level formula, at the current level of approximately 300 percent; maintain our leverage ratio at current levels while exploring the potential benefits of further reductions; maintain holding company liquidity to cover at least one year of fixed charges; and evaluate opportunities for the effective use of holding company liquidity in excess of our target.

At the end of the third quarter of 2007, the RBC ratio for our traditional U.S. insurance subsidiaries remained consistent with our target level for the combined RBC ratio, and our holding company liquidity met our planning objectives.

In the first quarter of 2007, we purchased and retired \$150.0 million of our adjustable conversion-rate equity security units, and in the second quarter of 2007, we redeemed \$34.5 million of our 6.85% senior debentures. During the first nine months of 2007, we made principal payments of \$15.0 million on our senior secured non-recourse notes issued by our wholly-owned subsidiary Tailwind Holdings, LLC (Tailwind Holdings). Our debt to total capital ratio was 25.1 percent at the end of the third quarter of 2007, compared to 28.8 percent at the beginning of 2007, subsequent to our cumulative effect adjustment to equity for the adoption of the new accounting policies related to deferred acquisition costs and income taxes. We define total capital as debt plus stockholders' equity, excluding the net unrealized gain or loss on securities and the net gain or loss on cash flow hedges.

The debt to total capital ratio, when calculated excluding the non-recourse debt and associated equity of Tailwind Holdings and allowing 50 percent equity credit for the adjustable conversion-rate equity security units that were still outstanding at the beginning of the year, was 24.2 percent at the end of the third quarter of 2007, compared to 26.2 percent at the beginning of 2007.

On October 31, 2007, we announced the completion of a securitization of our closed block of individual income protection reserves through the issuance of \$800.0 million floating rate, insured, senior, secured notes by our wholly-owned subsidiary Northwind Holdings, LLC (Northwind Holdings). The transaction also includes the intercompany reinsurance of \$11.1 billion of statutory reserves, representing approximately 95 percent of our Individual Income Protection – Closed Block segment, to Northwind Reinsurance Company (Northwind Re), a newly formed special purpose financial captive insurance company domiciled in Vermont and owned by Northwind Holdings. With the risk transfer to Northwind Re, our traditional U.S. insurance subsidiaries will be able to release excess statutory capital previously supporting this reinsured closed block business. The excess capital will be transferred to Unum Group from the ceding companies through extraordinary dividends. This capital structure allows us to continue to fully support the risk profile of this closed block of business while we redeploy excess capital to other uses.

As a result of the build-up of excess capital from improved operating trends and in anticipation of the securitization transaction, we recently formalized our capital management goals and objectives. The first priority is to maintain sufficient financial flexibility to support our operations over various economic cycles and to respond to opportunities in the marketplace while positioning our Company for improvements in its credit ratings. We have set in place several financial targets which will guide our capital management decisions including:

- Maintain a risk based capital ratio of 300 percent or greater for our traditional U.S. insurance subsidiaries. This is to be measured on a weighted average basis using the NAIC Company Action Level formula.
- Maintain leverage at approximately 25 percent. Leverage will be measured as debt to total capital, excluding the non-recourse debt and associated equity of Tailwind Holdings and Northwind Holdings.

[Table of Contents](#)

- Maintain excess capital at our holding companies sufficient to cover one year of fixed charges (measured as interest expense plus common stock dividends) plus a capital fund which will vary with business and economic conditions.
- Maintain a common stock dividend yield that is near the median of our peer companies.

We consider any capital above that needed to achieve and maintain these metrics to be excess capital available to fund share repurchases, business growth, or acquisitions. Our goal in allocating excess capital is to maximize risk-adjusted shareholder returns over a three to five year time period, with share repurchase used as the benchmark for evaluating uses for excess capital. See “Liquidity and Capital Resources” contained herein for further detail on anticipated capital deployment during the remainder of 2007 and into 2008.

Outstanding Legal and Regulatory Issues

During the first nine months of 2007, we continued to make progress in resolving our outstanding legal and regulatory issues as described in Note 9 of the “Notes to Consolidated Financial Statements” contained herein in Item 1.

During the third quarter of 2007, we received two favorable rulings dismissing, with prejudice, both the antitrust and RICO causes of action in the case entitled In re Insurance Brokerage Antitrust Litigation. A motion to dismiss the remaining cause of action regarding alleged violations of ERISA remains outstanding. In the meantime, discovery in the case remains stayed.

During the second quarter of 2007, we executed a settlement agreement resolving the plan beneficiary class action, or 401(k) case, which is one of the multidistrict litigation matters discussed in our litigation footnote. The settlement agreement has been finalized but is subject to further court approval. The entire cost of the settlement was covered by insurance proceeds. In addition, we executed an agreement, subject to court approval, to settle all claims in the case entitled In re UnumProvident Corp. Securities Litigation. The amount of the settlement was \$40.0 million, of which \$28.4 million was covered by insurance proceeds. The net expense of \$11.6 million was included in our second quarter of 2007 operating results.

During the first quarter of 2007, we reached an agreement in principle to resolve the putative derivative action in Leonard v. UnumProvident Corporation, et. al. which asserts claims against us and various members of our board of directors. The proposed settlement, the terms of which are not expected to be material to us, was approved by the court during the third quarter of 2007.

We have now substantially completed the claims reassessment process, as required by the regulatory settlement agreements. Any remaining claim reassessment costs will not have a material effect on our financial position or results of operations. The final examination under the multistate regulatory settlement agreement has commenced and is expected to be completed by mid-year 2008.

First Nine Months 2007 Significant Transactions and Events

Revised Claim Reassessment Reserve Estimate

In the second quarter of 2007, we increased our provision for the estimated cost of the claim reassessment process \$53.0 million before tax and \$34.5 million after tax based on changes in our emerging experience for the number of decisions being overturned and the average cost per reassessed claim. The claim reassessment process was implemented as a result of the settlement agreements we entered into with various state insurance regulators in 2004 and 2005. See Item 7 of our annual report on Form 10-K for the year ended December 31, 2006 for a discussion of these settlement agreements.

The revised second quarter estimate was based on the cost of approximately 99 percent of the potential inventory of claim reassessment information forms returned to us, with our claim reassessment on approximately 88 percent of the forms completed at that time. At the time of our second quarter of 2007 revision, we had not yet finalized our claim reassessment on the remaining forms but had performed a financial review and included that information in

[Table of Contents](#)

our analysis of emerging experience. Additional information regarding the second quarter revision to our estimate is as follows:

1. For the second quarter of 2007, the overturn rate averaged 48 percent and was 45 percent for the first six months of 2007.
2. The average overturn rate was 40 percent at June 2007 from inception to date, compared to 37 percent at December 2006.
3. The average incurred cost per reassessed claim during the first six months of 2007 was above the assumption we used for our third quarter 2006 revision.
4. Our assumption concerning the total number of claims projected to be reassessed remained at approximately 23,000, with slightly more claims for group long-term income protection and fewer for individual income protection.
5. We increased our previous estimate for benefit costs for claims reopened for our Unum US group long-term income protection product line \$76.5 million. The revision related to the increase during the second quarter of 2007 in the overturn rate and the average cost, as well as a slightly higher number of claims.
6. We decreased our previous estimate for benefit costs for claims reopened for our Individual Income Protection – Closed Block segment \$10.7 million. Although the experience relative to our assumptions for the overturn rate was slightly higher, experience indicated that the total number of claims for this segment would be less than our previous assumptions.
7. We decreased our previous estimate for the additional incremental direct claim reassessment operating expenses \$12.8 million due to our projections for an earlier completion of the reassessment process. We released \$10.3 million for Unum US group long-term income protection and \$2.5 million for our Individual Income Protection – Closed Block segment.
8. These second quarter of 2007 adjustments to our claim reassessment costs decreased before-tax operating earnings for our Unum US group income protection line of business \$66.2 million and increased before-tax operating earnings for our Individual Income Protection – Closed Block segment \$13.2 million.

Financing

The scheduled remarketing of the senior note element of the 2004 adjustable conversion-rate equity units (units) occurred in February 2007, as stipulated by the terms of the original offering, and we reset the interest rate on \$300.0 million of senior notes due May 15, 2009 to 5.859%. We purchased \$150.0 million of the senior notes in the remarketing which were subsequently retired. The associated write-off of deferred debt costs decreased first quarter of 2007 income by \$2.4 million before tax, or \$1.6 million after tax. In May 2007, we settled the purchase contract element of the 2004 units by issuing 17.7 million shares of common stock. We received proceeds of approximately \$300.0 million from the transaction.

During the first nine months of 2007, we made principal payments of \$15.0 million on our senior secured non-recourse variable rate notes due 2036 which were issued by Tailwind Holdings. During the second quarter of 2007, we purchased \$34.5 million aggregate principal amount of our outstanding 6.85% notes due 2015. The costs associated with this debt reduction decreased our first nine months 2007 income approximately \$0.8 million before tax, or \$0.6 million after tax.

On October 31, 2007, Northwind Holdings, a newly formed Delaware limited liability company and a wholly-owned subsidiary of Unum Group, issued \$800.0 million of floating rate, insured, senior, secured notes due 2037 in a private offering. The notes bear interest at a floating rate equal to the three month London Interbank Offered Rate (LIBOR) plus 0.78%. Recourse for the payment of principal, interest, and other amounts due on the notes will be dependent principally on the receipt of dividends from Northwind Re, the sole subsidiary of Northwind Holdings. The ability of Northwind Re to pay dividends to Northwind Holdings will depend on its satisfaction of applicable

[Table of Contents](#)

regulatory requirements and on the performance of the business of Paul Revere Life, Provident, and Unum America (collectively, the ceding insurers) reinsured by Northwind Re. None of Unum Group, the ceding insurers, Northwind Re, or any other affiliate of Northwind Holdings is an obligor or guarantor on the notes.

See “Liquidity and Capital Resources” contained herein in Item 2 and Notes 6 and 10 of the “Notes to Consolidated Financial Statements” contained in Item 1 for additional information.

Dispositions

During the first quarter of 2007, we completed the sale of our wholly-owned subsidiary, GENEX Services, Inc. (GENEX), a leading workers’ compensation and medical cost containment services provider. Our growth strategy is focused on the development of our primary markets, and GENEX’s specialty role in case management and medical cost containment related to the workers’ compensation market was no longer consistent with our overall strategic direction. We recognized an after-tax gain on the transaction of approximately \$6.2 million. See Note 3 of the “Notes to Consolidated Financial Statements” contained herein in Item 1 for additional information.

Income Tax

The income tax rate in the U.K. will be reduced from 30 percent to 28 percent in April 2008. In accordance with U.S. generally accepted accounting principles (GAAP), we are required to adjust deferred tax assets and liabilities through income on the date of enactment of a rate change, which occurred during the third quarter of 2007. Therefore, we recorded a reduction of \$1.7 million to our income tax expense in the third quarter of 2007 to reflect the impact of the rate change on our net deferred tax liability related to our U.K. operations.

Accounting Pronouncements

Effective January 1, 2007, we adopted the provisions of Statement of Position 05-1 (SOP 05-1), *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts*. SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs (DAC) on internal replacements of insurance and investment contracts other than those specifically described in Statement of Financial Accounting Standards No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. The cumulative effect of applying the provisions of SOP 05-1 decreased our 2007 opening balance of retained earnings \$445.2 million.

Effective January 1, 2007, we adopted the provisions of Financial Accounting Standards Board Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes, an interpretation of Statement of Financial Accounting Standards No. 109 (SFAS 109)*. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise’s financial statements in accordance with SFAS 109. Unlike SFAS 109, FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Additionally, FIN 48 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The cumulative effect of applying the provisions of FIN 48 increased our 2007 opening balance of retained earnings \$22.7 million.

Effective January 1, 2007, we adopted the provisions of Statement of Financial Accounting Standards No. 155 (SFAS 155), *Accounting for Certain Hybrid Financial Instruments, an amendment of Statement of Financial Accounting Standards Nos. 133 (SFAS 133) and 140 (SFAS 140)*. SFAS 155:

- (a) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation;
- (b) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133; (c) establishes a requirement to evaluate beneficial interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; (d) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and,
- (e) eliminates restrictions on a qualifying special-purpose entity’s ability to hold passive derivative financial instruments that pertain to beneficial interests that are or contain a derivative financial instrument. The adoption of SFAS 155 did not have a material effect on our financial position or results of operations.

First Nine Months 2006 Significant Transactions and Events

Revised Claim Reassessment Reserve Estimate

In the first quarter of 2006, we completed an analysis of our assumptions related to the reserves we established for the claim reassessment process. Our analysis was based on preliminary data as of the end of the first quarter of 2006, when actual results to date were considered credible enough to enable us to update our initial expectations of costs related to the reassessment process. We concluded that a change in our initial assumptions, primarily related to the number of claimants for whom payments will continue because the claimant remains eligible for disability payments, was warranted. We based our conclusion and our revised estimate on the information that existed at that time, which was the actual cost related to approximately 20 percent of the projected ultimate total number of claims expected to be reassessed. The characteristics, profile, and cost of those initial 20 percent of claims were more statistically credible than the information on which we based the initial charges in 2004 and 2005. Based on our analysis, in the first quarter of 2006 we recorded a charge of \$86.0 million before tax, or \$55.9 million after tax, to reflect our then current estimate of future obligations for benefit costs for claims reopened in the reassessment. The first quarter charge decreased 2006 before-tax operating results for our Unum US group income protection line of business \$72.8 million and our Individual Income Protection – Closed Block segment \$13.2 million.

In the third quarter of 2006, we increased our provision for the cost of the reassessment process \$325.4 million before tax and \$211.5 million after tax based on changes in our emerging experience for the number of decisions being overturned by the reassessment process and the average cost per reassessed claim. The revised third quarter estimate was based on the cost of approximately 55 percent of the projected ultimate total number of claims expected to be reassessed. The third quarter charge was comprised of \$310.4 million to reflect our revised estimate of future obligations for benefit costs for claims reopened in the reassessment and \$15.0 million for additional incremental direct claim reassessment operating expenses because of the additional time then estimated to complete the process. Our best estimate of \$310.4 million for the reopened claims assumed that the nature and characteristics of the approximately 45 percent remaining claims estimated to be reassessed at that time would be similar to the average profile of the 55 percent already reviewed at that time. The third quarter charge decreased before-tax operating results for our Unum US group income protection line of business \$291.4 million and our Individual Income Protection – Closed Block segment \$34.0 million.

Financing

The scheduled remarketing of the senior note element of our 2003 units occurred in February 2006, as stipulated by the terms of the original offering, and we reset the interest rate on \$575.0 million of senior notes due May 15, 2008 to 5.997%. We purchased \$400.0 million of the senior notes in the remarketing which were subsequently retired. The associated write-off of deferred debt costs decreased 2006 income by \$5.3 million before tax, or \$3.4 million after tax. In May 2006, we settled the purchase contract element of the 2003 units by issuing 43.3 million shares of common stock. We received proceeds of approximately \$575.0 million from the transaction.

In June 2006, we purchased \$50.0 million of our outstanding 7.405% capital securities due 2038 and \$250.0 million aggregate principal amount of our outstanding 7.625% notes due 2011. The cost of the cash tender offer decreased our second quarter of 2006 income approximately \$17.8 million before tax, or \$11.6 million after tax.

In November 2006, Tailwind Holdings issued \$130.0 million of senior, secured notes in a private offering. The payment of principal, interest, and other amounts due on the notes will be dependent principally on the receipt of dividends from Tailwind Reinsurance Company (Tailwind Re), the sole subsidiary of Tailwind Holdings. The ability of Tailwind Re to pay dividends to Tailwind Holdings will depend on its satisfaction of applicable regulatory requirements and on the performance of the reinsured claims of Unum America reinsured by Tailwind Re. None of Unum Group, Unum America, Tailwind Re, or any other affiliate of Tailwind Holdings is an obligor or guarantor on the notes. See “Liquidity and Capital Resources” contained herein in Item 2 and Note 6 of the “Notes to Consolidated Financial Statements” contained in Item 1 for additional information.

[Table of Contents](#)

Accounting Pronouncements

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123 (revised 2004) (SFAS 123(R)), *Share-Based Payment*, which is a revision to Statement of Financial Accounting Standards No. 123 (SFAS 123), *Accounting for Stock-Based Compensation*. SFAS 123(R) focuses primarily on accounting for transactions in which an entity obtains employee service in exchange for share-based payments. Under SFAS 123(R), share-based awards that do not require future service (i.e., vesting awards) are expensed immediately. Share-based employee awards that require future service are amortized over the relevant service period. We adopted SFAS 123(R) using the modified prospective transition method. Under this method, the provisions are generally applied only to share-based awards granted after adoption. The adoption of SFAS 123(R) did not have a material effect on our financial position or results of operations.

Critical Accounting Estimates

We prepare our financial statements in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect amounts reported in our financial statements and accompanying notes. Estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed in our financial statements.

The accounting estimates deemed to be most critical to our results of operations and financial condition are those related to reserves for policy and contract benefits, DAC, valuation of fixed maturity investment securities, and income taxes. There have been no significant changes in our critical accounting estimates during the first nine months of 2007, other than those resulting from the January 1, 2007 adoption of SOP 05-1 and FIN 48, which were disclosed in our "Critical Accounting Estimates" in our 2006 Form 10-K and are also discussed in Notes 2 and 8 of the "Notes to Consolidated Financial Statements" included herein in Item 1.

For additional information concerning our accounting policies and critical accounting estimates, see Note 1 of the "Notes to Consolidated Financial Statements" in Part II, Item 8 and "Critical Accounting Estimates" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2006.

N.M. = not a meaningful percentage

In describing our results, we may at times note certain items and exclude the impact of these items on financial ratios and metrics to enhance the understanding and comparability of our Company's performance and the underlying fundamentals in our operations, but this exclusion is not an indication that similar items may not recur. The second quarter of 2007 and first and third quarter of 2006 revisions to our estimate of benefit costs and associated operating expenses for claims reopened in our claim reassessment process affect the comparability of the financial results reported herein and, only where noted, are excluded from certain of our financial ratios and metrics.

Consolidated premium income was slightly higher in the third quarter of 2007 relative to the third quarter of 2006, but was marginally lower in the first nine months of 2007 relative to the same prior year period. We reported increases in premium income for the third quarter and first nine months of 2007 relative to the comparable prior year periods for Unum US supplemental and voluntary lines of business, Unum UK, and Colonial. Unum US group income protection and group life and accidental death and dismemberment lines of business experienced declines in premium income, as expected, due primarily to our continued pricing discipline for our Unum US group business and our strategy of developing a more balanced business mix. Premium income in the Individual Income Protection – Closed Block segment decreased in the third quarter and first nine months of 2007 relative to the same prior year periods due primarily to the expected decline in this block of closed business.

[Table of Contents](#)

Net investment income was higher in the third quarter and first nine months of 2007 than the third quarter and first nine months of 2006 due primarily to the growth in invested assets and an increase in bond call premiums, offset by a lower yield due to the investment of new cash at lower rates than that of our overall portfolio yield and a decline in the level of prepayment income on mortgage-backed securities. We expect that our portfolio yield will continue to gradually decline until the market rates on new purchases increase above the level of the overall yield in our portfolio, but our investment income is expected to increase due to the continued growth in invested assets. Although the fair value at which we report our fixed maturity securities in our consolidated balance sheets increased only \$190.9 million during the first nine months of 2007, due primarily to the impact of the increase in interest rates on fair values, our amortized cost of fixed maturity securities increased over \$1.2 billion during the first nine months of the 2007, reflecting new purchase activity.

For the third quarter and first nine months, we reported net realized investment losses of \$46.1 million and \$39.4 million in 2007 compared to gains of \$4.8 million and \$1.5 million for the comparable periods of 2006. Included in those amounts are changes in the fair value of the embedded derivatives in certain reinsurance contracts, which resulted in net realized losses of \$27.7 million and \$21.4 million in the third quarter and first nine months of 2007 compared to a net realized gain of \$3.0 million and a loss of \$4.5 million for the prior year periods. Also, in the third quarter of 2007, we recognized losses of \$18.4 million related to the decline in fair value below amortized cost for certain securities for which it was determined during the third quarter of 2007 that we no longer had the intent to hold to recovery or maturity due to anticipated changes in our capital requirements resulting from the reinsurance transactions involving our Individual Income Protection – Closed Block segment business and the related issuance of \$800.0 million of senior, secured notes in a private offering, as previously discussed herein, as well as our capital redeployment plans. We actively manage our credit risk and expect our gains and losses for the fourth quarter of 2007 to be relatively consistent with the first two quarters of 2007. See “Investments” contained herein in Item 2 for further discussion.

The reported ratio of benefits and change in reserves for future benefits to premium income was 86.9 percent and 89.1 percent for the third quarter and first nine months of 2007 compared to 106.1 percent and 97.3 percent for the same periods of 2006. Our reported benefits and change in reserves for future benefits include charges of \$65.8 million for the first nine months of 2007 and \$310.4 million and \$396.4 million for the third quarter and the first nine months of 2006, respectively, related to revisions to our estimate of benefit costs for claims reopened in our claim reassessment process. Excluding these charges, the ratio of benefits and change in reserves for future benefits to premium income was 88.0 percent for the first nine months of 2007 and 90.3 percent and 90.6 percent, respectively, for the third quarter and first nine months of 2006. See “Segment Results” as follows for discussions of line of business risk results and claims management performance in each of our segments.

Interest and debt expense is lower relative to the third quarter and first nine months of 2006 due to the reduction in our outstanding debt.

The reported ratio of compensation and other expenses to premium income declined in the third quarter and first nine months of 2007 relative to the prior year periods. Those expenses include increases (decreases) in the claim reassessment related incremental direct operating expense estimates of \$(12.8) million in the first nine months of 2007 and \$15.0 million in the third quarter and first nine months of 2006, as well as the charge of \$18.5 million for the broker compensation settlements in the third quarter and first nine months of 2006. Excluding those items, our expense ratios increased in comparison to the third quarter and first nine months of 2006. The increase was due primarily to the decrease in premium income, as well as the second quarter of 2007 litigation settlement expense and additional expenses associated with the development of new product offerings in our core lines of business. We intend to aggressively manage our expenses while continuing to increase the effectiveness of our operating processes.

As previously noted, during the third quarter of 2007, we recorded a reduction of \$1.7 million to our income tax expense to reflect the impact of the enactment of the U.K. tax rate change on our net deferred tax liability related to our U.K. operations.

[Table of Contents](#)**Consolidated Sales***(in millions of dollars)*

	Three Months Ended September 30			Nine Months Ended September 30		
	2007	% Change	2006	2007	% Change	2006

N.M. = not a meaningful percentage

Sales results shown in the preceding chart generally represent the annualized premium or annualized fee income on new sales which we expect to receive and report as premium income or fee income during the next 12 months following or beginning in the initial quarter in which the sale is reported, depending on the effective date of the new sale. Sales do not correspond to premium income or fee income reported as revenue in accordance with GAAP. This is because new annualized sales premiums reflect current sales performance and what we expect to recognize as premium or fee income over a 12 month period, while premium income and fee income reported in our financial statements are reported on an “as earned” basis rather than an annualized basis and also include renewals and persistency of in force policies written in prior years as well as current new sales.

Premiums for fully insured products are reported as premium income. Fees for ASO products (those where the risk and responsibility for funding claim payments remain with the customer and we only provide services) are included in other income. Sales, persistency of the existing block of business, and the effectiveness of the renewal program are indicators of growth in our premium and fee income. Trends in new sales, as well as existing market share, also indicate our potential for growth in our respective markets and the level of market acceptance of price changes and new product offerings. Sales results may fluctuate significantly due to case size and timing of sales submissions. We intend to continue with our disciplined approach to pricing and also with our strategy of developing a more balanced business mix. This strategy is expected to result in a lower premium persistency or market share, particularly in the large case Unum US group market, but historically the profitability of business that terminates has generally been lower than the profitability of retained business. We do not anticipate a decline in the number of cases, or case persistency, for our Unum US group market on an aggregate basis.

See “Segment Results” as follows for additional discussion of sales by segment.

Segment Results

Our reporting segments are comprised of the following: Unum US, Unum UK, Colonial, Individual Income Protection – Closed Block, Other, and Corporate. In the following segment financial data and discussions of segment results, “operating revenue” excludes net realized investment gains and losses. “Operating income” or “operating loss” excludes net realized investment gains and losses and income tax. These are considered non-GAAP financial measures. A non-GAAP financial measure is a numerical measure of a company’s performance, financial position, or cash flows that excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP.

[Table of Contents](#)

These non-GAAP financial measures of “operating revenue” and “operating income” or “operating loss” differ from revenue and income (loss) from continuing operations before income tax as presented in our consolidated operating results and in income statements prepared in accordance with GAAP due to the exclusion of before tax realized investment gains and losses. We measure segment performance for purposes of Statement of Financial Accounting Standards No. 131, *Disclosures about Segments of an Enterprise and Related Information*, excluding realized investment gains and losses because we believe that this performance measure is a better indicator of the ongoing businesses and the underlying trends in the businesses. Our investment focus is on investment income to support our insurance liabilities as opposed to the generation of realized investment gains and losses, and a long-term focus is necessary to maintain profitability over the life of the business. Realized investment gains and losses depend on market conditions and do not necessarily relate to decisions regarding the underlying business of our segments. However, income or loss excluding realized investment gains and losses does not replace net income or net loss as a measure of overall profitability. We may experience realized investment losses, which will affect future earnings levels since our underlying business is long-term in nature and we need to earn the assumed interest rates in our liabilities.

A reconciliation of total operating revenue by segment to total consolidated revenue and total operating income by segment to consolidated net income is as follows:

(in millions of dollars)

	Three Months Ended September 30		Nine Months Ended September 30	
	2007	2006	2007	2006
Operating Revenue by Segment	\$ 2,656.3	\$ 2,612.6	\$ 7,915.8	\$ 7,837.7
Net Realized Investment Gain (Loss)	(46.1)	4.8	(39.4)	1.5
Revenue	<u>\$ 2,610.2</u>	<u>\$ 2,617.4</u>	<u>\$ 7,876.4</u>	<u>\$ 7,839.2</u>
Operating Income (Loss) by Segment	\$ 325.1	\$ (102.2)	\$ 811.2	\$ 198.3
Net Realized Investment Gain (Loss)	(46.1)	4.8	(39.4)	1.5
Income Tax (Benefit)	92.0	(32.1)	259.9	70.4
Income from Discontinued Operations	—	1.6	6.9	5.5
Net Income (Loss)	<u>\$ 187.0</u>	<u>\$ (63.7)</u>	<u>\$ 518.8</u>	<u>\$ 134.9</u>

As previously noted, included in operating income (loss) by segment are before-tax charges of \$53.0 million in the first nine months of 2007 and \$325.4 million and \$411.4 million in the third quarter and the first nine months of 2006, respectively, related to revisions to our regulatory claim reassessment reserve estimates. These charges lowered net income \$34.5 million in 2007 and \$211.5 million and \$267.4 million in 2006 for the applicable periods.

[Table of Contents](#)

Unum US Segment

The Unum US segment includes group long-term and short-term income protection insurance, group life and accidental death and dismemberment products, and supplemental and voluntary lines of business. The supplemental and voluntary lines of business are comprised of recently issued individual income protection insurance, group and individual long-term care insurance, and voluntary workplace benefits products.

Unum US Operating Results

Shown below are financial results for Unum US. In the sections following, financial results and key ratios are also presented for the major lines of business within the segment.

N.M. = not a meaningful percentage

Sales for Unum US in the third quarter of 2007 were higher than that of the prior year period, but on a year-to-date basis, declined from the level of 2006. We maintained our disciplined pricing and our overall sales mix was generally in line with our target mix. In the third quarter of 2007, we had a sales mix in our group product lines of approximately 69 percent core market and 31 percent large case market. In the first nine months of 2007, we had a sales mix of approximately 57 percent core market and 43 percent large case market, generally in line with our targeted 60 percent core/40 percent large case market distribution mix. Although sales on an annualized premium basis declined year over year in our group core market segment, the number of new accounts in this segment increased over the prior year first nine months.

Sales for our individual income protection line of business increased over the prior year third quarter and first nine months. We continue to focus on the multi-life individual income protection business, with approximately 94.0 percent and 93.4 percent of total third quarter and first nine months of 2007 sales for this line of business occurring in the multi-life market. Long-term care sales were generally in line with our strategy for this product line, with growth in the group product and a decline in sales for individual long-term care. Our voluntary workplace benefits sales increased in the third quarter and first nine months of 2007 relative to the same prior year periods, consistent with our focus on sales growth in our voluntary product lines.

We anticipate that sales for our group core market segment and our supplemental lines will increase during the remainder of 2007 relative to the prior year. Because our focus for our 2007 renewal program is aimed primarily at improving the profitability of our large case group business, sales and persistency for the large case market segment have declined during 2007, as expected. As previously noted, during the third quarter of 2007, we introduced *Simply Unum*, a new product offering and administrative platform designed to better meet the needs of our group core market segment and our voluntary market. The full roll out to all sales offices is expected to occur during the first quarter of 2008.

Unum US Persistency and Renewal of Existing Business

A continuing part of our strategy for Unum US group business involves executing our renewal programs and managing persistency in our existing blocks of business. Our renewal programs have generally been successful in retaining business that is relatively more profitable than business that terminated. While we expect that the additional premium and related profits associated with renewal activity will continue to emerge, we intend to balance the renewal program with the need to maximize persistency and retain broker relationships. As previously discussed, we expected persistency, measured in both premium dollars and in number of cases, for the large case group market segment to decline during 2007 relative to the prior year because of our 2007 strategy for this market. We do not expect premium and case persistency to decline for our core group market segment.

As previously discussed, we adopted the provisions of SOP 05-1 effective January 1, 2007, and recorded a cumulative effect adjustment which decreased our 2007 opening balance of Unum US DAC \$589.8 million. SOP 05-1 provides guidance on accounting for DAC on internal replacements and effectively shortens the amortization period for DAC for many of our group products. Despite the shorter amortization period, we do not believe that the adoption of SOP 05-1 will have a material effect on amortization expense for Unum US as a result of the decrease in DAC from the cumulative effect adjustment. We will continue to monitor the persistency of the existing business and reflect changes relative to our amortization assumptions, as appropriate, in the current period's amortization of DAC.

In January of 2006, we began a process of filing a request with various state insurance departments for rate adjustments on one older series of individual long-term care policies. The rate adjustment brings the rates for this policy series closer to today's market, better reflecting current interest rates, higher expected future claims, persistency, experience, and other factors related to pricing individual long-term care coverage. In states for which a rate increase is submitted and approved, customers are also given options for coverage changes or other approaches that might fit their current financial and insurance needs. Higher premium income associated with the rate increases has begun to emerge and is expected to continue to do so during the remainder of 2007.

Group Short-term Income Protection				87.1%		85.8%

(1) Included in this ratio is the second quarter of 2007 \$76.5 million increase in our claim reassessment reserve estimate. Excluding this revision, the benefit ratio for the nine months ended September 30, 2007 would have been 92.7%.

Included in this ratio are the third quarter of 2006 \$276.4 million and first quarter of 2006 \$72.8 million increases in our claim reassessment reserve estimate. Excluding these revisions, the benefit ratio for the three and nine month periods ended September 30, 2006 would have been 94.5% and 95.0%, respectively.

(2) Included in this ratio is the second quarter of 2007 \$10.3 million decrease in our claim reassessment incremental direct operating expense estimate. Excluding this revision, the other expense ratio for the nine months ended September 30, 2007 would have been 23.6%.

[Table of Contents](#)

Included in this ratio is the third quarter of 2006 \$15.0 million increase in our claim reassessment incremental direct operating expense estimate. Excluding this revision, the other expense ratio for the three and nine month periods ended September 30, 2006 would have been 22.6% and 23.1%, respectively.

- (3) *Included in this ratio is the second quarter of 2007 \$66.2 million net increase in our claim reassessment cost estimate. Excluding this revision, the before-tax operating income ratio for the nine months ended September 30, 2007 would have been 8.5%.*

Included in this ratio are the third quarter of 2006 \$291.4 million and first quarter of 2006 \$72.8 million increases in our claim reassessment cost estimate. Excluding these revisions, the before-tax operating income ratio for the three and nine month periods ended September 30, 2006 would have been 2.7% and 1.5%, respectively.

Premium income for group income protection decreased in the third quarter and first nine months of 2007 relative to the prior year, as expected, due primarily to our more disciplined approach to pricing, renewals, and risk selection. Premium persistency and case persistency are both consistent with our expectations given our business mix strategy. Net investment income increased in the third quarter and first nine months of 2007 in comparison to the same prior year periods due to the growth in the level of assets supporting these lines of business and an increase in bond call premiums, partially offset by the impact of the lower yield resulting from the lower interest rate environment. Other income includes ASO fees of \$16.7 million and \$48.4 million for the third quarter and first nine months of 2007, respectively, and \$14.8 million and \$46.0 million for the third quarter and first nine months of 2006.

Excluding the revisions to our estimate for claim reassessment costs, the benefit ratios for the third quarter and first nine months of 2007 were lower than the benefit ratios for the comparable periods of 2006 due primarily to lower paid claims in both group long-term and short-term income protection and a higher rate of claim recoveries relative to the third quarter and first nine months of 2006.

Our claim operational effectiveness continues to improve as a result of our organizational and process changes. While additional performance improvement is expected to occur during the remainder of 2007, the operational improvement we have projected may occur at a slower rate, and we may incur higher than anticipated claim costs.

The net decrease in the amortization of DAC is due primarily to the decrease in the level of DAC for these lines of business resulting from the adoption of the new accounting policy related to DAC on internal replacements, offset somewhat by higher amortization resulting from the shorter amortization period for DAC. The other expense ratio, excluding the adjustments to our claim reassessment incremental operating expense estimate, increased slightly in the third quarter and first nine months of 2007 compared to the same prior year periods due to the decline in premium income. We continue to aggressively manage expenses against this expected revenue decline.

As discussed under “Cautionary Statement Regarding Forward-Looking Statements,” certain risks and uncertainties are inherent in our group income protection business. Components of claims experience, including, but not limited to, incidence and recovery rates, may be worse than we expect. Both economic and societal factors can affect claim incidence. Adjustments to reserve amounts may be required if there are changes in assumptions regarding the incidence of claims or the rate of recovery, as well as persistency, mortality, and interest rates used in calculating the reserve amounts.

Case Persistency:						
Group Life				87.2%		86.5%
Accidental Death & Dismemberment				87.6%		86.6%

N.M. = not a meaningful percentage

As expected, premium income in group life decreased in the third quarter and first nine months of 2007 relative to the same prior year periods due primarily to our more disciplined approach to pricing, renewals, and risk selection. Premium persistency and case persistency are both consistent with our expectations. The decrease in net investment income relative to the prior year third quarter and first nine months resulted primarily from a decline in the level of assets supporting these lines of business.

The benefit ratio decreased in the third quarter and first nine months of 2007 due primarily to a lower submitted and paid claim incidence rate for group life, offset partially by higher paid claim incidence rates for the accidental death and dismemberment line of business.

[Table of Contents](#)

Similar to our group income protection products, amortization of DAC is lower this year relative to last year due to the adoption of SOP 05-1. Other expenses decreased in the third quarter and first nine months of 2007 relative to the same prior year periods, enabling the other expense ratio to remain stable against the expected decline in premium income.

[Table of Contents](#)

The increase in premium income for the third quarter and first nine months of 2007 relative to the prior year third quarter and first nine months is due to sales growth and overall stable persistency, although premium persistency for certain of the product lines declined compared to the prior year. Net investment income increased relative to the prior year third quarter and first nine months primarily from growth in the level of assets supporting these lines of business.

The interest adjusted loss ratio for the individual income protection – recently issued business decreased slightly in the third quarter and first nine months of 2007 relative to the same prior year periods due primarily to a decrease in the submitted claim incidence rate as well as an increase in the claim recovery rate. The interest adjusted loss ratio for long-term care was higher in the third quarter and first nine months of 2007 than in the same prior year periods due primarily to an increase in the submitted claim incidence rate and a decrease in the claim recovery and mortality rates. The benefit ratio for voluntary workplace benefits decreased in comparison to the third quarter and first nine months of 2006 due primarily to a lower rate of paid claim incidence.

The amortization of deferred acquisition costs increased in the third quarter and first nine months of 2007 relative to the same prior year periods due to the acceleration of amortization for certain of the product lines with lower than anticipated persistency. Other expenses for the third quarter of 2007 and the first nine months of 2007 increased in comparison to the third quarter and first nine months of 2006, driven primarily by growth in the long-term care and voluntary workplace benefits lines of business. The other expense ratio for the supplemental and voluntary lines of business increased slightly in comparison to the third quarter of 2006 but decreased relative to the first nine months of 2006 due to the growth in premium income.

Segment Outlook

Our primary focus for the remainder of 2007 is continued improvement of our claims management performance in our group income protection line of business, with an expected overall benefit ratio for group income protection in the 90 to 92 percent range by the end of 2007, excluding the second quarter of 2007 impact from the revision to our claim reassessment reserve. We also continue to focus on improved profitability in certain of our supplemental products and the maintenance of current performance levels in our other lines.

We intend to continue to invest in technology and new product solutions to meet the changing needs and opportunities in our markets. Our *Simply Unum* product offering and administrative platform, designed to better meet the needs of our group core market segment and our voluntary market, was introduced in selected sales offices during the third quarter of 2007, and we are pleased with the market reception. *Simply Unum* is a long-term strategy and will continue to adapt to the needs of our marketplace in multiple phases over the next several years.

We continue to shift our mix of business to the group core market and the supplemental and voluntary product lines and to maintain our disciplined approach to pricing, renewals, and risk selection, with a continued effort to balance growth and profitability. This strategy has, as expected, caused a lower premium persistency or market share, particularly in the large case market. As expected, we have not experienced a decline in the number of cases, or case persistency, for our Unum US group core market segment or for the Unum US group market on an aggregate basis.

Foreign Currency Translation

The functional currency of Unum UK is the British pound. Unum UK's premiums, net investment income, claims, and expenses are received or paid in pounds, and we hold pound-denominated assets to support Unum UK's pound-denominated policy reserves and liabilities. We translate Unum UK's pound-denominated financial statement items into dollars for our consolidated financial reporting. We translate income statement items using an average exchange rate for the reporting period, and we translate balance sheet items using the exchange rate at the end of the period. We report unrealized foreign currency translation gains and losses in accumulated other comprehensive income in our consolidated balance sheets.

Fluctuations in the pound to dollar exchange rate have an effect on Unum UK's reported financial results and our consolidated financial results. In periods when the pound weakens, translating pounds into dollars decreases current year results relative to the prior year. In periods when the pound strengthens, translating into dollars increases current year results in relation to the prior year. Shown below are operating results in Unum UK's local currency.

[Table of Contents](#)

Premium income increased in the third quarter and first nine months of 2007 relative to the third quarter and first nine months of 2006 due primarily to prior period sales increases and an increase in persistency for the group life product line, partially offset by a decline in persistency for the group long-term income protection product line. Net investment income decreased in the third quarter of 2007 in comparison to the third quarter of 2006 due to decreased income related to the investment portfolio's index-linked bonds. Net investment income increased in the first nine months of 2007 relative to the same prior year period due to continued growth in the business and the assets supporting the lines of business and also due to the positive year-to-date performance of the investment portfolio's index-linked bonds.

The lower benefit ratio in the third quarter and first nine months of 2007 in comparison to the third quarter and first nine months of 2006 was primarily the result of a third quarter of 2007 adjustment to our long-term assumptions for claim reserves due to emerging experience and our view of future events, which increased third quarter and year-to-date 2007 segment operating income approximately £8.2 million. Also contributing to a lower benefit ratio for the first nine months of 2007 was a lower rate of claim incidence for both group long-term income protection and group life, partially offset by lower claim recoveries for group long-term income protection. Claim incidence rates for the third quarter of 2007 were consistent with that of the prior year third quarter.

Commissions increased in the third quarter and first nine months of 2007 relative to the same prior year periods due primarily to prior period sales in the group long-term income protection line of business.

Amortization of DAC increased in the third quarter and first nine months of 2007 due to the shorter amortization period for DAC resulting from the adoption of SOP 05-1. The amount of the cumulative effect adjustment decreased the 2007 opening balance of Unum UK DAC approximately £45.1 million, or \$88.3 million, which results in decreased amortization because of the lower deferred asset level. However, the timing of policy renewals occurring during 2007 results in increased amortization, causing an overall net increase in expense for the third quarter and first nine months of 2007. The other expense ratio decreased in the third quarter and first nine months of 2007 compared to the same prior year periods due to higher premium income and a continued focus on expense management.

Sales

Sales in Unum UK decreased in the third quarter of 2007 relative to the prior year third quarter driven primarily by a decrease in sales in the large case market, which for Unum UK equals employee groups with 500 lives or more. However, sales increased in the first nine months of 2007 relative to the prior year first nine months, with sales in the core market segment, or employee groups with less than 500 lives, particularly high relative to the prior year. Sales in the U.K. market were negatively impacted during 2006 by lower employee benefits purchase decisions caused by distraction in the U.K. employee benefits market due to changes in pension legislation. However, U.K. legislative changes that removed discrimination by employers on the basis of age, therefore encouraging the extension of insurance coverage, became effective in October 2006. We anticipate that sales will continue to improve throughout the remainder of 2007.

Segment Outlook

During the remainder of 2007, we intend to focus on maintaining our strong leadership position in the U.K. We expect that the level of profitability in the fourth quarter of 2007 will approximate that of the first two quarters of the year. We anticipate that our high levels of profitability will continue, but with margins likely to return to below 30 percent in the medium to longer term. We also expect slower growth in operating income as the acquisition related growth of the last several years subsides.

We plan to explore additional market opportunities to expand our growth in both the group and individual markets through new distribution channels and new product offerings. We believe that there is significant opportunity to expand the U.K. market for the products and services we offer. We also intend to invest in process solutions to meet our customers' needs and increase our operating efficiency.

Colonial Segment

The Colonial segment includes insurance for income protection products, life products, and cancer and critical illness products issued by Colonial Life & Accident Insurance Company and marketed to employees at the workplace through an agency sales force and brokers.

Operating Results

Shown below are financial results and key performance indicators for Colonial.

(in millions of dollars, except ratios)

Operating Ratios (% of Premium Income):						
Benefit Ratio	48.6%		52.6%	48.3%		52.5%
Other Expense Ratio	19.0%		18.0%	19.2%		18.3%
Before-tax Operating Income Ratio	27.5%		24.5%	27.7%		23.7%
Premium Persistency:						
Income Protection				76.0%		75.0%
Life				82.9%		85.0%
Cancer and Critical Illness				83.8%		82.5%

Growth in premium income was attributable primarily to current and prior period sales growth and stable persistency, aided in part by the lapsing of policies during the first quarter of 2006 in hurricane-impacted areas. Net investment income increased in the third quarter and first nine months of 2007 in comparison to the same prior year periods due primarily to growth in the level of assets supporting these lines of business.

The benefit ratio for this segment decreased in the third quarter and first nine months of 2007 in comparison to the third quarter and first nine months of 2006 due primarily to favorable risk experience in the income protection and life lines of business. The improvement in the income protection lines of business resulted from the continued

[Table of Contents](#)

favorable experience related to several new products introduced in 2004. In addition, individual short-term income protection claim incidence and average claim duration decreased in the third quarter and first nine months of 2007 compared to the same prior year periods, while the average claim payment was higher in the third quarter and first nine months of 2007 relative to the same prior year periods. For accident products, which are included in the income protection line of business, the claim incidence rate and average claim payment both decreased in the third quarter and first nine months of 2007 relative to the third quarter and first nine months of 2006. The life line of business reported a decrease in incurred claims for the third quarter and the first nine months of 2007. The cancer and critical illness product line also reported lower benefits and reserve changes in the third quarter and first nine months of 2007 relative to the same prior year periods.

Although we continue to focus on expense management, the other expense ratio for the third quarter and first nine months of 2007 increased in comparison to the same prior year periods due primarily to our investment in the development of additional product offerings and to one-time adjustments to commissions and operating expenses that occurred in the second quarter of 2006 that increased commissions and reduced other expenses.

Sales

(in millions of dollars)

	Three Months Ended September 30			Nine Months Ended September 30		
	2007	% Change	2006	2007	% Change	2006
Income Protection	\$ 47.1	2.2%	\$ 46.1	\$ 139.4	3.7%	\$ 134.4
Life	14.9	(2.6)	15.3	44.7	0.4	44.5
Cancer and Critical Illness	12.5	8.7	11.5	36.6	6.7	34.3
Total Sales	\$ 74.5	2.2	\$ 72.9	\$ 220.7	3.5	\$ 213.2

Colonial's sales in the third quarter and first nine months of 2007 increased in comparison to the prior year's third quarter and first nine months primarily due to sales increases in the public sector market for educators and in the commercial market segment for employee groups with less than 100 lives. Also contributing to the sales increase was an increase in the number of new accounts over the prior year third quarter and first nine months, offset partially by a decrease in the average new case size, which resulted in lower annualized premium per case sold.

Segment Outlook

During the remainder of 2007, we intend to increase sales by investing in various growth initiatives, including the introduction of additional product offerings. During the third quarter of 2007, we introduced a new hospital confinement indemnity insurance plan. In the fourth quarter of 2007, we expect to introduce a group limited benefit plan designed to target employees without major medical coverage. We believe this growth strategy will consistently produce a higher level of premium and operating income growth over the long term.

The premium growth of over 10 percent in the first quarter of 2007 was aided in part by the lapsing of policies during the first quarter of 2006 in hurricane-impacted areas, as previously noted. As a result, we anticipate premium growth for the fourth quarter of 2007 to approximate our second quarter and third quarter growth trends, while the favorable risk experience is expected to continue during the remainder of 2007 but may not be sustainable over the long term.

Our 2007 initiatives also include continued development of improved business tools through the effective use of technology, additional development of our sales organization, and an increase in our sales activity through expansion into markets and territories where we have less market share. We believe that the changes we have made and continue to make in our sales organization through recruiting, development, and training will continue to drive accelerated growth through improved productivity.

[Table of Contents](#)

Individual Income Protection - Closed Block Segment

The Individual Income Protection – Closed Block segment generally consists of those individual income protection policies that were designed to be distributed to individuals in a non-workplace setting and that were written or assumed prior to the restructuring of our individual income protection business. We have reinsurance agreements which effectively provide approximately 60 percent reinsurance coverage for our overall risk above a specified retention limit, which is approximately \$7.9 billion at September 30, 2007. The maximum risk limit for the reinsurer grows to approximately \$2.4 billion over time, after which any further losses will revert to us.

Operating Results

Shown below are financial results and key performance indicators for the Individual Income Protection – Closed Block segment. As previously discussed, included in operating income (loss) is a before-tax credit of \$13.2 million in the first nine months of 2007 and charges of \$13.2 million and \$47.2 million in the third quarter and first nine months of 2006, respectively, related to revisions to our regulatory claim reassessment reserve estimates.

(in millions of dollars, except ratios)

Premium Persistency				94.4%		94.3%

N.M. = not a meaningful percentage

(1) Included in this ratio is the second quarter of 2007 \$10.7 million decrease in our claim reassessment reserve estimate. Excluding this revision, the interest adjusted loss ratio for the nine months ended September 30, 2007 would have been 92.9%.

Included in this ratio are the third quarter of 2006 \$34.0 million and first quarter of 2006 \$13.2 million increases in our claim reassessment reserve estimate. Excluding these revisions, the interest adjusted loss ratio for the three and nine month periods ended September 30, 2006 would have been 93.0% and 92.5%, respectively.

(2) Included in this ratio is the second quarter of 2007 \$2.5 million decrease in our claim reassessment incremental direct operating expense estimate. Excluding this revision, the other expense ratio for the nine months ended September 30, 2007 would have been 13.7%.

[Table of Contents](#)

(3) *Included in this ratio is the second quarter of 2007 \$13.2 million decrease in our claim reassessment cost estimate. Excluding this revision, the before-tax operating income ratio for the nine months ended September 30, 2007 would have been 10.7%.*

Included in this ratio are the third quarter of 2006 \$34.0 million and first quarter of 2006 \$13.2 million increases in our claim reassessment cost estimate. Excluding these revisions, the before-tax operating income ratio for the three and nine month periods ended September 30, 2006 would have been 11.1% and 11.3%, respectively.

The decrease in premium income for the third quarter and first nine months of 2007 relative to the same prior year periods is due to the expected decline in this block of closed business, as well as a first quarter of 2007 adjustment to premium income for a small block of ceded business for which the contract was modified. Partially offsetting these declines is an increase in premium income due to the third quarter of 2007 reinsurance recapture of a small block of business, with an effective date of January 1, 2007. On an ongoing basis, this small block of business generates less than \$2.0 million of premium income per quarter. Net investment income increased in the third quarter of 2007 compared to the prior year due primarily to the reinsurance recapture. Net investment income decreased in the first nine months of 2007 compared to the first nine months of 2006 due to a decrease in the level of assets supporting this business and the decline in the overall portfolio yield rate, partially offset by the third quarter reinsurance recapture and the associated investment income. Other income includes the underlying results of certain blocks of reinsured business.

The interest adjusted loss ratio was lower in the third quarter of 2007 than the prior year third quarter, excluding the third quarter of 2006 increase in the claim reassessment reserve estimate, due primarily to a higher rate of claim recoveries and a decrease in the rate of submitted claim incidence. The interest adjusted loss ratio was higher in the first nine months of 2007 than the ratio for the first nine months of 2006, excluding the revisions to the claim reassessment reserve estimate noted previously, due primarily to an increase in benefit payments, partially offset by a higher rate of claim recoveries. Benefits and change in reserves for future benefits also includes the impact from the previously mentioned third quarter of 2007 recapture of a small block of business. The recapture had an immaterial impact on third quarter of 2007 segment operating income.

Segment Outlook

We believe that the interest adjusted loss ratio for this block of business will be relatively flat over the long term, but the segment may experience quarterly volatility. Claim resolution rates are very sensitive to operational and environmental changes and can be volatile over short periods of time. We consider the variability in our claim resolution rate experience during recent years to be primarily the result of the temporary reduction in the operating effectiveness of our claims management performance. Claim resolution rates in 2007 have been more consistent with our expected rates. Our claim resolution rate assumption used in determining reserves is our expectation of the resolution rate we will experience over the life of the block of business and will vary from actual experience in any one period. It is possible, however, that variability in our reserve assumptions could result in a material impact on our reserve levels.

As previously noted, during October 2007, we entered into an intercompany reinsurance transaction whereby approximately 95 percent of our Individual Income Protection – Closed Block segment was ceded from Paul Revere Life, Provident, and Unum America to Northwind Re. With the risk transfer to Northwind Re, we intend to release excess statutory capital previously supporting this reinsured closed block business. As a result, the capital allocated to our Individual Income Protection – Closed Block segment will decline, and this segment will report less net investment income in the future due to lower asset levels needed to support allocated capital. Because this is an intercompany reinsurance arrangement, reported results will remain unchanged for this segment other than the lower net investment income. This capital structure allows us to continue to fully support the risk profile of this closed block of business while we redeploy excess capital to other uses.

[Table of Contents](#)**Other Segment**

The Other operating segment includes results from Unum US insured products not actively marketed (with the exception of certain individual income protection products), including individual life and corporate-owned life insurance, reinsurance pools and management operations, group pension, health insurance, and individual annuities. We expect operating revenue and income resulting from the products that are not actively marketed to decline over time as these business lines wind down, and we expect to reinvest the capital supporting these lines of business in the future growth of our Unum US, Unum UK, and Colonial segments.

Reinsurance Pools and Management

Our reinsurance operations include the reinsurance management operations of Duncanson & Holt, Inc. (D&H) and the risk assumption, which includes reinsurance pool participation; direct reinsurance, which includes accident and health (A&H), long-term care (LTC), and long-term disability coverages; and Lloyd's of London (Lloyd's) syndicate participations. During the years 1999 through 2001, we exited our reinsurance pools and management operations through a combination of a sale, reinsurance, and/or placement of certain components in run-off. During the third quarter and first nine months of 2007, this line of business reported operating losses of \$2.1 million and \$6.2 million, respectively, compared to operating income (loss) of \$ 0.1 million and \$(6.7) million in the same prior year periods.

Individual Life and Corporate-Owned Life

During 2000, we reinsured substantially all of the individual life and corporate-owned life insurance blocks of business and ceded approximately \$3.3 billion of reserves to the reinsurer. The \$388.2 million before-tax gain on these transactions was deferred and is being amortized into income based upon expected future premium income on the traditional insurance policies ceded and estimated future gross profits on the interest-sensitive insurance policies ceded.

Total operating revenue for individual life and corporate-owned life insurance was \$7.3 million and \$23.9 million in the third quarter and first nine months of 2007, respectively, compared to \$9.3 million and \$28.5 million in the same prior year periods. Operating income was \$6.3 million and \$21.7 million in the third quarter and first nine months of 2007, respectively, compared to \$8.6 million and \$24.4 million in the same prior year periods.

[Table of Contents](#)

Other

Group pension, health insurance, individual annuities, and other closed lines of business had combined operating revenue of \$23.7 million and \$75.3 million in the third quarter and first nine months of 2007, respectively, compared to \$25.5 million and \$78.1 million in the same prior year periods. For the third quarter and first nine months of 2007, these product lines produced combined operating losses of \$0.6 million and \$4.3 million, respectively, compared to combined operating income (loss) of \$(0.9) million and \$0.3 million for the same prior year periods.

Corporate Segment

The Corporate segment includes investment income on corporate assets not specifically allocated to a line of business, corporate interest expense, and certain corporate income and expense not allocated to a line of business.

Operating revenue in the Corporate segment was \$9.8 million and \$26.6 million in the third quarter and first nine months of 2007, respectively, compared to \$16.0 million and \$49.0 million in the comparable periods of 2006. The Corporate segment reported operating losses of \$35.7 million and \$134.3 million in the third quarter and first nine months of 2007, respectively, compared to \$49.1 million and \$146.3 million in the same prior year periods.

Included in the Corporate segment operating results for the first nine months of 2007 were \$3.2 million of costs related to the early retirement of debt compared to \$23.1 million of costs related to the early retirement of debt in the same prior year period. Also included in the first nine months of 2007 operating results is the previously discussed second quarter litigation settlement accrual of \$11.6 million and in the operating results for the third quarter and first nine months of 2006, the broker compensation settlement expenses of \$18.5 million.

Interest and debt expense was \$43.9 million and \$137.5 million in the third quarter and first nine months of 2007 compared to \$44.2 million and \$146.0 million in the same prior year periods, excluding the costs related to early retirement of debt. See "Debt" contained herein in Item 2 for further discussion.

Discontinued Operations

On March 1, 2007, we completed the sale of our wholly-owned subsidiary, GENEX, and recognized an after-tax gain on the transaction of approximately \$6.2 million. This gain, together with the first quarter of 2007 after-tax income, is reported as discontinued operations in our statements of income. Also included in discontinued operations is third quarter and first nine months of 2006 after-tax income for GENEX of \$1.6 million and \$5.5 million, respectively. GENEX's third quarter and first nine months of 2006 operating revenue of \$45.6 million and \$137.7 million and operating income of \$2.8 million and \$9.5 million were previously reported in the Other segment. See Note 3 of the "Notes to Consolidated Financial Statements" contained herein in Item 1 for additional information.

Investments

Overview

Investment activities are an integral part of our business, and profitability is significantly affected by investment results. We segment our invested assets into portfolios that support our various product lines. Generally, our investment strategy for our portfolios is to match the effective asset cash flows and durations with related expected liability cash flows and durations to consistently meet the liability funding requirements of our businesses. We try to maximize investment income and assume credit risk in a prudent and selective manner, subject to constraints of quality, liquidity, diversification, and regulatory considerations. Our overall investment philosophy is to invest in a portfolio of high quality assets that provide investment returns consistent with those assumed in the pricing of our insurance products. Assets are invested predominately in fixed maturity securities, and the portfolio is matched with liabilities so as to eliminate as much as possible our exposure to changes in the overall level of interest rates. Changes in interest rates may affect the amount and timing of cash flows. For information on our formal investment philosophy, including our overall quality and diversification objectives, see "Investments" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2006.

[Table of Contents](#)

We actively manage our asset and liability cash flow match, as well as our asset and liability duration match, to minimize interest rate risk. We may redistribute investments within our different lines of business, when necessary, to adjust the cash flow and/or duration of the asset portfolios to better match the cash flow and duration of the liability portfolios. Asset and liability portfolio modeling is updated on a quarterly basis and is used as part of the overall interest rate risk management strategy. Cash flows from the inforce asset and liability portfolios are projected at current interest rate levels and also at levels reflecting an increase and a decrease in interest rates to obtain a range of projected cash flows under the different interest rate scenarios. These results enable us to assess the impact of projected changes in cash flows and duration resulting from potential changes in interest rates. Testing the asset and liability portfolios under various interest rate scenarios enables us to choose the most appropriate investment strategy as well as to minimize the risk of disadvantageous outcomes. This analysis is a precursor to our activities in derivative financial instruments, which are used to hedge interest rate risk and to manage duration match. At September 30, 2007, the weighted average duration of our policyholder liability portfolio was approximately 8.03 years, and the weighted average duration of our investment portfolio supporting those policyholder liabilities was approximately 7.31 years.

Net investment income was \$603.2 million and \$1,790.5 million in the third quarter and first nine months of 2007, respectively, an increase of 4.2 percent relative to each of the same prior year periods. The increase was due primarily to growth in invested assets and an increase in bond call premiums, offset by a lower yield due to the investment of new cash at lower rates than that of our overall portfolio yield and a decline in the level of prepayment income on mortgage-backed securities. The overall yield in our investment portfolio was 6.70 percent as of September 30, 2007, and the weighted average credit rating was A2. This compares to an overall yield in the portfolio of 6.73 percent as of December 31, 2006 and a weighted average credit rating of A2. We expect the portfolio yield to continue to gradually decline until the market rates on new purchases equal or exceed the level of the overall yield.

Realized Investment Gains and Losses

We recognize impairment losses when we determine that the value of certain fixed maturity securities has other than temporarily declined during the applicable reporting period, as well as when there are further declines in the values of fixed maturity securities that were initially written down in a prior period. One of the factors we evaluate in determining when a decline in fair value below amortized cost of a fixed maturity security is other than temporary is our ability and intent to retain the security for a sufficient period of time for it to recover. During the third quarter of 2007, we recognized losses of \$18.4 million related to the decline in fair value below amortized cost for certain securities for which it was determined during the third quarter of 2007 that we no longer had the intent to hold to recovery or maturity due to anticipated changes in our capital requirements, as previously discussed. See “Critical Accounting Estimates” in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2006, for a complete discussion of the valuation of fixed maturity securities.

We also report changes in the fair values of certain embedded derivatives as realized investment gains and losses, as required under the provisions of Statement of Financial Accounting Standards No. 133 Implementation Issue B36 (DIG Issue B36), *Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposure That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor Under Those Instruments*. During the third quarter of 2007, changes in the fair value of the embedded derivatives in certain reinsurance contracts resulted in net realized losses of \$27.7 million. The loss resulted primarily from a widening of credit spreads in the overall investment market, not from credit deterioration of the investments held in the portfolios supporting the modified coinsurance reserves.

[Table of Contents](#)

Realized investment gains and losses, before tax, are as follows:

(in millions of dollars)

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2007	2006	2007	2006
Gross Realized Investment Gain from Sales	<u>\$ 11.4</u>	<u>\$ 16.8</u>	<u>\$69.2</u>	<u>\$ 63.5</u>
Gross Realized Investment Loss				
Write-downs	23.5	0.5	56.4	12.1
Sales	6.3	14.5	30.8	45.4
Total	<u>29.8</u>	<u>15.0</u>	<u>87.2</u>	<u>57.5</u>
Change in Fair Value of DIG Issue B36 Derivatives	<u>(27.7)</u>	<u>3.0</u>	<u>(21.4)</u>	<u>(4.5)</u>
Net Realized Investment Gain (Loss)	<u>\$(46.1)</u>	<u>\$ 4.8</u>	<u>\$(39.4)</u>	<u>\$ 1.5</u>

We had no individual realized investment losses \$10.0 million or greater from other than temporary impairments or from the sale of fixed maturity securities during the first nine months of 2007. During the second quarter of 2007, we recorded an adjustment to the book values and related unrealized loss of two securitized asset trusts acquired in 2001 to reflect the values that would have been present had we recorded the investment income as dividends rather than interest accretion. The book value adjustment of \$20.2 million was recognized as a realized investment loss in the second quarter of 2007. Because the investments no longer satisfied our investment objectives, we subsequently sold the trusts in June of 2007 and recognized a realized investment gain of \$24.9 million on the sale.

During the first nine months of 2006, we had no individual realized investment losses \$10.0 million or greater from other than temporary impairments but did recognize one realized investment loss in excess of that amount. In the first quarter of 2006, we recognized a loss of \$13.1 million on securities issued by a U.S. based automotive parts supplier. This company had experienced lower sales due to declining auto production and higher expenses due to increasing steel prices. In an October 2005 press release, this company confirmed that due to accounting errors it would restate its previously released 2004 and first and second quarter 2005 earnings and delay third and fourth quarter 2005 earnings releases. In a first quarter of 2006 press release, the company reported third quarter 2005 results which were significantly below expectations and also withdrew guidance of positive free cash flow for its fiscal year 2005. Trade creditors put into place more stringent credit terms in response to the weaker financial results, which forced the company into bankruptcy in the first quarter of 2006. A portion of these securities had an investment-grade rating at the time of purchase, and a portion was purchased after the securities had been downgraded to below-investment-grade in the second quarter of 2001. At the time of sale, these securities had been continuously in an unrealized loss position for a period of greater than three years. The circumstances of this investment have no impact on other investments.

Fixed Maturity Securities

Fixed maturity securities at September 30, 2007, included \$34.8 billion, or 98.9 percent, of bonds and derivative instruments and \$397.5 million, or 1.1 percent, of redeemable preferred stocks. The following table shows the fair value composition by internal industry classification of the fixed maturity bond portfolio and the associated unrealized gains and losses.

**Fixed Maturity Bonds – By Industry Classification
As of September 30, 2007**

(in millions of dollars)

Classification	Fair Value	Net Unrealized Gain (Loss)	Fair Value of Bonds with Gross Unrealized Loss	Gross Unrealized Loss	Fair Value of Bonds with Gross Unrealized Gain	Gross Unrealized Gain

Total	<u>\$1,238.9</u>	<u>\$ 141.6</u>	
<i>Below-Investment Grade</i>			
U.S. Based Communications Company	<u>\$ 19.8</u>	<u>\$ 13.6</u>	> 2 years <= 3 years

Unrealized losses on investment-grade fixed maturity securities principally relate to changes in interest rates or changes in market or sector credit spreads which occurred after the acquisition of the securities. These changes are generally temporary and are not recognized as realized investment losses unless the securities are sold, it becomes unlikely that we will hold the securities until recovery based on relevant facts and circumstances, or the securities become other than temporarily impaired. Generally, below-investment-grade fixed maturity securities are more likely to develop credit concerns. In determining whether a decline in fair value below amortized cost of a fixed maturity security is other than temporary, we utilize a formal, well-defined, and disciplined process to monitor and evaluate our fixed income investment portfolio. The process results in a thorough evaluation of problem investments and the recording of realized losses on a timely basis for investments determined to have an other than temporary impairment.

For those fixed maturity securities with an unrealized loss and on which we have not recorded an impairment loss, we believe that the decline in fair value below amortized cost is temporary. We have the ability and intent to hold our securities to the earlier of recovery or maturity. If information becomes available that changes our assessment as to whether we will receive contractual payments related to a fixed maturity security and the security is also not projected to recover in value, the related security is generally sold. We may also in certain circumstances sell a security in an unrealized loss position because of changes in tax laws, when a merger or the disposition of a segment or product line results in positions outside of our investment guidelines, due to changes in regulatory or capital requirements, due to unexpected changes in liquidity needs, to better match portfolio cash flows, or to take advantage of relative value opportunities or tender offers that recover up to or beyond the cost of the investment.

[Table of Contents](#)

For those securities with a gross unrealized loss of \$10.0 million or greater, further discussed as follows are (a) the factors which we believe resulted in the impairment and (b) the information we considered, both positive and negative, in reaching the conclusion that the impairments were not other than temporary.

- The fair value of the securities of the United Kingdom based financial institution declined due to a significant decrease in its liquidity, although The Bank of England has guaranteed the institution's deposits. In addition, at the time of the decrease in liquidity, the regulatory authority of the U.K. financial services industry stated that the financial institution "exceeds regulatory requirements and has a good quality loan book". The fair value of these securities has since increased since September 30, 2007, and we believe that the decline in fair value of these securities is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.
- The first fixed maturity bond of the U.S. government sponsored mortgage funding company was issued by the Federal Home Loan Bank. The bond was rated AAA by Standard & Poor's Corporation (S&P) as of September 30, 2007, with no negative outlook by rating agencies or in analysts' reports. The change in the market value of this security relates to changes in interest rates after the purchase of the bond. We believe that the decline in fair value of this security is temporary. The market value of this security will increase if interest rates decline to levels similar to when the bonds were purchased. We believe this is likely to occur over the life of the security. We have the ability to hold this security to the earlier of recovery or maturity.
- The second fixed maturity bond of the U.S. government sponsored mortgage funding company was issued by the Federal Home Loan Mortgage Corporation. The bond was rated AAA by S&P as of September 30, 2007, with no negative outlook by rating agencies or in analysts' reports. The change in the market value of this security relates to changes in interest rates after the purchase of the bond. We believe that the decline in fair value of this security is temporary. The market value of this security will increase if interest rates decline to levels similar to when the bonds were purchased. We believe this is likely to occur over the life of the security. We have the ability to hold this security to the earlier of recovery or maturity.
- The principal protected equity linked note is a zero coupon bond, issued by a large, well capitalized Fortune 500 financial services company, the return of which is linked to a Vanguard S&P 500 index mutual fund. This bond matures on August 24, 2020 and carried the AA rating of the issuer, as determined by S&P as of September 30, 2007. This note has an embedded derivative contract and substitutes highly rated bonds in place of the underlying S&P 500 index mutual fund to provide principal protection if there is a significant decline in the equities market. The note derives its value from the underlying S&P 500 index mutual fund. This note is currently at an unrealized loss because the fixed rate of accretion on the note has exceeded the rate of return on the underlying S&P 500 index fund since the purchase date of the note. Based on historical long-term returns of the S&P 500 index, we believe that the value of the underlying S&P 500 index mutual fund will equate to or exceed the par value of the security at maturity. We believe that the decline in fair value of the note is temporary. We have the ability to hold this security to the earlier of recovery or maturity.
- The fair value of the fixed maturity bonds of the U.S. based communication company has declined primarily due to the proposed buyout of the company by a private equity investor. If successful, the buyout, which is subject to shareholder and regulatory approval as well as additional financing, would result in higher debt balances and higher use of cash for debt interest payments. This higher cash outflow is expected to be partially offset by tax savings and expense savings. The company is in the process of selling certain assets to limit funding needs. Its remaining operations and capital resources are estimated to be of sufficient value to fully satisfy its potential debt obligations. The bond was rated B- by S&P as of September 30, 2007, with a "watch negative" outlook. We believe that the decline in fair value of these securities is temporary. We have the ability to hold these securities to the earlier of recovery or maturity.

[Table of Contents](#)

Our mortgage/asset-backed securities were approximately \$4.0 billion and \$3.8 billion on an amortized cost basis at September 30, 2007 and December 31, 2006, respectively. At September 30, 2007, the mortgage/asset-backed securities had an average life of 8.0 years, effective duration of 6.3 years, and a weighted average credit rating of Aaa. The mortgage/asset-backed securities are valued on a monthly basis using valuations supplied by the brokerage firms that are dealers in these securities. The primary risk involved in investing in mortgage/asset-backed securities is the uncertainty of the timing of cash flows from the underlying loans due to prepayment of principal with the possibility of reinvesting the funds in a lower interest rate environment. We use models which incorporate economic variables and possible future interest rate scenarios to predict future prepayment rates.

We have not invested in mortgage-backed derivatives, such as interest-only, principal-only, or residuals, where market values can be highly volatile relative to changes in interest rates. All of our mortgage-backed securities are fixed rate. The credit quality of our mortgage-backed securities portfolio has not been negatively impacted by the recent issues in the market concerning subprime mortgage loans. The change in value of our mortgage-backed securities portfolio has moved in line with that of prime agency-backed mortgage-backed securities.

As of September 30, 2007, our exposure to below-investment-grade fixed maturity securities was \$2,187.1 million, approximately 5.8 percent of the fair value of invested assets excluding ceded policy loans, consistent with the 5.8 percent reported at the end of 2006. Below-investment-grade bonds are inherently more risky than investment-grade bonds since the risk of default by the issuer, by definition and as exhibited by bond rating, is higher. Also, the secondary market for certain below-investment-grade issues can be highly illiquid. Additional downgrades may occur, but we do not anticipate any liquidity problem caused by our investments in below-investment-grade securities, nor do we expect these investments to adversely affect our ability to hold our other investments to maturity.

We have a significant interest in, but are not the primary beneficiary of, a special purpose entity which is a collateralized bond obligation asset trust in which we hold interests in several of the tranches and for which we act as investment manager of the underlying securities. Our investment in this entity is reported at fair value as a component of fixed maturity securities in the consolidated balance sheets. The fair value of this investment was derived from the fair value of the underlying assets. The fair value and amortized cost of this investment were \$13.3 million and \$12.6 million, respectively, at September 30, 2007, and \$18.8 million and \$18.4 million, respectively, at December 31, 2006.

Mortgage Loans and Real Estate

Our mortgage loan portfolio was \$1,010.7 million and \$944.0 million on an amortized cost basis at September 30, 2007 and December 31, 2006, respectively. We expect that we will continue to add investments in this category either through the secondary market or through loan originations. We believe our mortgage loan portfolio is well diversified geographically and among property types. The incidence of problem mortgage loans and foreclosure activity remains low, and we expect the level of delinquencies and problem loans to remain low in the future. We had no impaired mortgage loans at September 30, 2007. Impaired mortgage loans totaled \$2.8 million at December 31, 2006.

Real estate was \$20.2 million and \$17.9 million at September 30, 2007 and December 31, 2006, respectively. Investment real estate is carried at cost less accumulated depreciation. Real estate acquired through foreclosure is valued at fair value at the date of foreclosure and may be classified as investment real estate if it meets our investment criteria. If investment real estate is determined to be permanently impaired, the carrying amount of the asset is reduced to fair value. Occasionally, investment real estate is reclassified to real estate held for sale when it no longer meets our investment criteria. Real estate held for sale, which is valued net of a valuation allowance that reduces the carrying value to the lower of cost or fair value less estimated cost to sell, was \$8.9 million and \$6.5 million at September 30, 2007 and December 31, 2006, respectively.

We use a comprehensive rating system to evaluate the investment and credit risk of each mortgage loan and to identify specific properties for inspection and reevaluation. We establish an investment valuation allowance for mortgage loans based on a review of individual loans and the overall loan portfolio, considering the value of the underlying collateral. Investment valuation allowances for real estate held for sale are established based on a review of specific assets. If a decline in the value of a mortgage loan or real estate investment is considered to be other than

[Table of Contents](#)

temporary or if the asset is deemed permanently impaired, the investment is reduced to estimated net realizable value, and the reduction is recognized as a realized investment loss. We monitor the risk associated with these invested asset portfolios and regularly review and adjust the investment valuation allowance. We had no valuation allowance for mortgage loans at September 30, 2007. At December 31, 2006, the balance in the valuation allowance for mortgage loans was \$0.5 million. At September 30, 2007 and December 31, 2006, the balance in the valuation allowance for real estate was \$7.6 million.

Derivatives

We use derivative financial instruments to manage reinvestment risk, duration, and currency risk. Historically, we have utilized interest rate futures contracts, current and forward interest rate swaps and options on forward interest rate swaps, current and forward currency swaps, interest rate forward contracts, forward treasury locks, currency forward contracts, and forward contracts on specific fixed income securities. All of these freestanding derivative transactions are hedging in nature and not speculative. Positions under our hedging programs for derivative activity that were open during the third quarter and first nine months of 2007 involved current and forward interest rate swaps, current and forward currency swaps, currency forward contracts, forward treasury locks, and options on forward interest rate swaps. Almost all hedging transactions are associated with the individual and group long-term care and the individual and group income protection products. All other product portfolios are periodically reviewed to determine if hedging strategies would be appropriate for risk management purposes.

During the second quarter of 2006, we completed a program to reset the interest rates of several receive fixed, pay variable forward starting interest rate swaps by replacing various existing swaps with new swaps at current market interest rates and identical cash flow dates. This allowed us to increase our utilization of cash flows as well as reduce our credit exposure to our counterparties. Under this program, we added and terminated swaps with a notional amount of \$1,515.0 million each, resulting in a gain of \$136.4 million which we reported in other comprehensive income (loss). The anticipated cash flows hedged by these derivatives are still probable, and the gains from the terminated swaps along with the replacement swaps continue to be highly effective cash flow hedges. These terminations and the associated gain are included in the hedging activity discussed in the following two paragraphs.

During the third quarters of 2007 and 2006, we recognized net losses of \$1.6 million and \$8.0 million, respectively, on the termination of cash flow hedges and reported \$(1.6) million and \$(8.0) million, respectively, in other comprehensive income (loss). During the first nine months of 2007 and 2006, we recognized net gains of \$13.5 million and \$174.8 million, respectively, on the termination of cash flow hedges and reported \$13.4 million and \$174.8 million, respectively, in other comprehensive income (loss). During the third quarter and first nine months of 2007, we reported a net gain of \$0.1 million as a component of realized investment gains and losses. We amortized \$3.5 million and \$8.5 million of net deferred gains into net investment income in the third quarters of 2007 and 2006, respectively, and \$16.5 million and \$23.9 million during the first nine months of 2007 and 2006, respectively.

Our current credit exposure on derivatives, which is limited to the value of those contracts in a net gain position, was \$29.4 million at September 30, 2007. Additions and terminations, in notional amounts, to our hedging programs during the third quarter of 2007 were \$80.5 million and \$271.5 million, respectively, and in the third quarter of 2006 were \$130.0 million and \$399.1 million, respectively. Additions and terminations include roll activity, which is the closing out of an old contract and the initiation of a new one when a contract is about to mature but the need for it still exists. The notional amount of derivatives outstanding under the hedge programs was \$3,324.4 million at September 30, 2007 and \$3,774.1 million at December 31, 2006.

As of September 30, 2007 and December 31, 2006, we had \$1,825.0 million and \$2,125.0 million, respectively, notional amount of forward starting interest rate swaps outstanding to lock in the reinvestment rates on future anticipated cash flows through the year 2013 for certain of our long-term product portfolios.

As of September 30, 2007 and December 31, 2006, we had \$333.5 million and \$367.8 million, respectively, notional amount of currency swaps and \$216.3 million notional amount of forward currency contracts outstanding to hedge the foreign currency risk associated with the U.S. dollar denominated debt issued by one of our U.K. subsidiaries.

[Table of Contents](#)

As of September 30, 2007 and December 31, 2006, we had \$620.8 million and \$658.4 million, respectively, notional amount of open current and forward foreign currency swaps to hedge fixed income Canadian dollar denominated securities.

As of September 30, 2007 and December 31, 2006, we had \$170.0 million notional amount of open options on forward interest rate swaps to lock in a reinvestment rate floor for the reinvestment of cash flows from renewals on policies with a one to two year minimum premium rate guarantee.

As of September 30, 2007 and December 31, 2006, we had \$60.0 million notional amount of an interest rate swap outstanding whereby we receive a fixed rate of interest and pay a variable rate of interest. The purpose of this swap is to hedge the variable cash flows associated with a floating rate security we own. The variable rate we pay on the swap is offset by the amount we receive on the variable rate security.

We have invested in certain structured fixed maturity securities that contain embedded derivatives with a notional amount of \$98.8 million and \$176.6 million as of September 30, 2007 and December 31, 2006, respectively. These embedded derivatives represent forward contracts and are accounted for as cash flow hedges. The purpose of these forward contracts is to hedge the risk of changes in cash flows related to the anticipated purchase of certain equity securities in the years 2020 through 2022.

We also have embedded derivatives in modified coinsurance contracts recognized under DIG Issue B36. The derivatives recognized under DIG Issue B36 are not designated as hedging instruments, and the change in fair value is reported as a realized investment gain or loss during the period of change. Due to the change in fair value of these embedded derivatives, we recognized \$27.7 million and \$21.4 million of net realized investment losses during the third quarter and first nine months of 2007, respectively, and \$3.0 million and \$(4.5) million of net realized investment gains (losses) during the third quarter and first nine months of 2006, respectively.

Non-current Investments

Our exposure to non-current investments, on a fair value basis, totaled \$16.2 million at September 30, 2007 compared to \$12.5 million at December 31, 2006. Non-current investments includes those investments for which principal and/or interest payments are more than 30 days past due. At September 30, 2007 these investments, which are subject to the same review and monitoring procedures in place for other investments in determining when a decline in fair value is other than temporary, consisted of fixed maturity securities and real estate acquired through foreclosure for which before-tax impairment losses of approximately \$76.2 million had been recorded life-to-date. The amortized cost and book value of the fixed maturity securities and real estate, subsequent to the write-downs for impairments, was \$3.9 million at September 30, 2007. Approximately \$13.9 million of the fixed maturity securities, on a fair value basis, had principal and/or interest payments past due for a period greater than one year as of September 30, 2007.

Other

We have an investment program where we simultaneously enter into repurchase agreement transactions and reverse repurchase agreement transactions with the same party. We net the related receivables and payables in the consolidated balance sheets since these transactions meet the requirements for the right of offset. We did not have any of these agreements in an open position at September 30, 2007. We also use the repurchase agreement market as a source of short-term financing, but had no contracts for this purpose outstanding at September 30, 2007.

Liquidity and Capital Resources

Our liquidity requirements are met primarily by cash flows provided from operations, principally in our insurance subsidiaries. Premium and investment income, as well as maturities and sales of invested assets, provide the primary sources of cash. Debt and/or securities offerings provide an additional source of liquidity. Cash is applied to the payment of policy benefits, costs of acquiring new business (principally commissions), operating expenses, and taxes, as well as purchases of new investments. We have established an investment strategy that we believe will provide for adequate cash flows from operations.

[Table of Contents](#)

Our policy benefits are primarily in the form of claim payments, and we have minimal exposure to the policy withdrawal risk associated with deposit products such as individual life policies or annuities. A decrease in demand for our insurance products or an increase in the incidence of new claims or the duration of existing claims could negatively impact our cash flows from operations. Deterioration in the credit market, which could delay our ability to sell our positions in certain of our fixed maturity securities in a timely manner, could also negatively impact our cash flows. We believe our cash resources are sufficient to meet our liquidity requirements for the next 12 months.

Our cash flows from discontinued operations are combined with cash flows from continuing operations within each cash flow statement category in our consolidated statements of cash flows for the applicable periods. The absence of cash flows from discontinued operations has not, nor is it expected to, materially affect liquidity and capital resources.

Consolidated Cash Flows

Operating Cash Flows

Net cash provided by operating activities was \$1,255.3 million for the nine months ended September 30, 2007, compared to \$851.2 million for the comparable period of 2006. Operating cash flows are primarily attributable to the receipt of premium and investment income, offset by payments of claims, commissions, expenses, and income taxes. Premium income growth is dependent not only on new sales, but on renewals of existing business, renewal price increases, and stable persistency. Investment income growth is dependent on the growth in the underlying assets supporting our insurance reserves and on the level of portfolio yield rates. Increases in commissions and operating expenses are attributable primarily to new sales growth and the first year acquisition expenses associated with new business. The level of paid claims is due partially to the growth and aging of the block of business and also to the general economy, as previously discussed in the operating results by segment. Included in operating cash flows for the nine months ended September 30, 2007 and 2006 are voluntary pension contributions to our U.S. qualified defined benefit plan of \$110.0 million and \$92.0 million, respectively. We also had increased cash inflows of approximately \$211.4 million in the third quarter of 2007 due to the reinsurance recapture of a small block of individual income protection business.

Investing Cash Flows

Investing cash inflows consist primarily of the proceeds from the sales and maturities of investments. Investing cash outflows consist primarily of payments for purchases of investments. Net cash used by investing activities was \$1,253.6 million and \$674.1 million for the nine months ended September 30, 2007 and 2006, respectively.

We had lower proceeds from sales and maturities of available-for-sale securities in the first nine months of 2007 than in the comparable period of 2006, primarily due to a decrease in fixed maturity security principal proceeds from bond calls, principal prepayments, and scheduled maturities. Also impacting the higher proceeds reported for 2006 was the sale of floating-rate bonds, discussed as follows. We issued debt in the fourth quarter of 2005 and invested the proceeds in short-term investments and floating-rate bonds to provide liquidity needed for our \$400.0 million purchase of debt in the remarketing of our 2003 adjustable conversion-rate equity security units (units) in the first quarter of 2006. The proceeds from the subsequent sale in 2006 of these short-term investments and floating-rate bonds are included in sales of bonds and net purchases of short-term investments in the first nine months of 2006.

Proceeds from sales and maturities of other investments increased in the first nine months of 2007 due to the sale of common stock investments.

Purchase activity increased during the first nine months of 2007, in part due to the investing of the net cash inflows of \$98.8 million from the sale of GENEX and the \$211.4 million cash inflows from the reinsurance recapture. There was an increase in net purchases of short-term investments to provide liquidity needed for our capital redeployment plan discussed below under "Subsequent Events."

[Table of Contents](#)

Financing Cash Flows

Financing cash flows consist primarily of borrowings and repayments of debt, issuance or repurchase of common stock, and dividends paid to stockholders. Net cash provided by financing activities was \$20.2 million for the nine months ended September 30, 2007 compared to net cash used of \$221.3 million in the comparable period of 2006. During the second quarter of 2007, we received proceeds of approximately \$300.0 million and issued 17.7 million shares of common stock upon the settlement of the common stock purchase contract element of the 2004 units. During the second quarter of 2006, we received proceeds of approximately \$575.0 million and issued 43.3 million shares of common stock upon the settlement of the common stock purchase contract element of the units issued in May 2003.

During the first quarters of 2007 and 2006, we purchased \$150.0 million and \$400.0 million, respectively, aggregate principal amounts of the remarketed senior note element of the 2004 and 2003 units, which were subsequently retired. During the first nine months of 2007, we made principal payments of \$15.0 million, respectively, on our senior secured non-recourse variable rate notes due 2036 which were issued by Tailwind Holdings. During the second quarter of 2007, we purchased \$34.5 million aggregate principal amount of our outstanding 6.85% notes due 2015. In the second quarter of 2006, we retired \$300.0 million of our outstanding debt.

See “Debt” as follows for further information.

Cash Available from Subsidiaries

Unum Group and certain of its intermediate holding company subsidiaries and/or finance subsidiaries depend on payments from subsidiaries to pay dividends to stockholders, to pay debt obligations, and/or to pay expenses. These payments by our insurance and non-insurance subsidiaries may take the form of interest payments on loans from the parent to a subsidiary, operating and investment management fees, and/or dividends.

Restrictions under applicable state insurance laws limit the amount of ordinary dividends that can be paid to a parent company from its insurance subsidiaries in any 12-month period without prior approval by regulatory authorities. For life insurance companies domiciled in the United States, that limitation generally equals, depending on the state of domicile, either ten percent of an insurer’s statutory surplus with respect to policyholders as of the preceding year end or the statutory net gain from operations, excluding realized investment gains and losses, of the preceding year.

The payment of ordinary dividends to a parent company from its insurance subsidiaries is generally further limited to the amount of statutory surplus as it relates to policyholders. Based on the restrictions under current law, during 2007, \$506.2 million is available for the payment of ordinary dividends to Unum Group from its U.S. insurance subsidiaries, excluding Tailwind Reinsurance Company, a wholly-owned subsidiary of Tailwind Holdings.

Unum Group and/or certain of its finance subsidiaries may also receive dividends from its United Kingdom-based affiliate, Unum Limited, subject to applicable insurance company regulations and capital guidance in the United Kingdom. Approximately \$200.2 million is available for the payment of dividends from Unum Limited during 2007.

The ability of Unum Group and certain of its intermediate holding company subsidiaries and/or finance subsidiaries to continue to receive dividends from their insurance subsidiaries without regulatory approval generally depends on the level of earnings of those insurance subsidiaries as calculated under law. In addition to regulatory restrictions, the amount of dividends that may be paid by insurance subsidiaries will depend on additional factors, such as RBC ratios, funding growth objectives at an affiliate level, and maintaining appropriate capital adequacy ratios to support desired ratings. Insurance regulatory restrictions do not limit the amount of dividends available for distribution from non-insurance subsidiaries except where the non-insurance subsidiaries are held directly or indirectly by an insurance subsidiary and only indirectly by Unum Group.

[Table of Contents](#)

Debt

At September 30, 2007, we had long-term debt, including senior secured non-recourse notes, and junior subordinated debt securities, totaling \$2,285.2 million and short-term debt of \$175.0 million due in May 2008. In the first nine months of 2007, we reduced our debt to total capital ratio to 25.1 percent, compared to 28.8 percent at the beginning of 2007, subsequent to our cumulative effect adjustment to equity for the adoption of the new accounting policies related to DAC and income taxes.

The debt to total capital ratio, when calculated excluding the non-recourse debt and associated equity of Tailwind Holdings and allowing 50 percent equity credit for the adjustable conversion-rate equity security units that were still outstanding at the beginning of 2007, was 24.2 percent at September 30, 2007, compared to 26.2 percent at the beginning of 2007.

During the nine months of 2007, we made principal payments of \$15.0 million on our senior secured non-recourse variable rate notes due 2036 which were issued by Tailwind Holdings. During the second quarter of 2007, we purchased \$34.5 million aggregate principal amount of our outstanding 6.85% notes due 2015.

In February 2007, the scheduled remarketing of the senior note element of the 2004 units occurred, as stipulated by the terms of the original offering, and we reset the interest rate on \$300.0 million of senior notes due May 15, 2009 to 5.859%. We purchased \$150.0 million of the senior notes in the remarketing which were subsequently retired. In May 2007, we settled the purchase contract element of the 2004 units by issuing 17.7 million shares of common stock. We received proceeds of approximately \$300.0 million from the transaction.

In June 2006, pursuant to a cash tender offer, we purchased \$50.0 million of our outstanding 7.405% capital securities due 2038 and \$250.0 million aggregate principal amount of our outstanding 7.625% notes due 2011.

In February 2006, the scheduled remarketing of the senior note element of the 2003 units occurred, as stipulated by the terms of the original offering, and we reset the interest rate on \$575.0 million of senior notes due May 15, 2008 to 5.997%. We purchased \$400.0 million of the senior notes in the remarketing which were subsequently retired. In May 2006, we settled the purchase contract element of the 2003 units by issuing 43.3 million shares of common stock. We received proceeds of approximately \$575.0 million from the transaction.

See "Debt" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2006, for further discussion.

Commitments

With respect to our commitments, see the discussion under "Commitments" in Part II, Item 7 of our annual report on Form 10-K for the year ended December 31, 2006.

Pensions and other postretirement benefit obligations were not previously included in our contractual obligations discussion under "Commitments." These obligations include our defined benefit pension and postretirement plans for our employees, including non-qualified pension plans. Pension plan obligations, other than the non-qualified plans, represent our contributions to the pension plans, with the next 12 months' contributions equaling our planned contributions and the remaining years' contributions projected based on the average remaining service period assuming the current funded status of the plans. Non-qualified pension plan and other postretirement benefit obligations represent the expected benefit payments related to these plans, discounted with respect to interest and reflecting expected future service, as appropriate.

We had previously presented our policyholder liabilities net of reinsurance ceded rather than on a gross basis as presented below. Policyholder liability maturities and the related reinsurance recoverable represent the projected payout of the current inforce policyholder liabilities and the expected cash inflows from reinsurers for liabilities ceded.

[Table of Contents](#)

The following table summarizes contractual obligations and our reinsurance recoverable by period as of December 31, 2006 (in millions of dollars). During the first nine months of 2007, there were no substantive changes in our commitments or contractual liabilities, including the effects of the adoption of FIN 48. We are unable to make reasonably reliable estimates of the period of potential cash settlements, if any, with taxing authorities.

	<u>Total</u>	<u>In 1 Year or Less</u>	<u>After 1 Year up to 3 Years</u>	<u>After 3 Years up to 5 Years</u>	<u>After 5 Years</u>
Payments Due					
Long-term Debt	\$ 5,594.1	\$ 181.2	\$ 814.1	\$ 623.5	\$ 3,975.3
Policyholder Liabilities	39,485.9	5,548.3	6,406.4	4,843.9	22,687.3
Pensions and Other Postretirement Benefits	2,003.9	133.9	126.5	127.1	1,616.4
Operating Leases	106.8	32.1	39.2	17.0	18.5
Purchase Obligations	96.1	95.2	0.9	—	—
Total	\$ 47,286.8	\$ 5,990.7	\$ 7,387.1	\$ 5,611.5	\$ 28,297.5
Receipts Due					
Reinsurance Recoverable	\$ 8,707.3	\$ 1,390.8	\$ 576.4	\$ 517.9	\$ 6,222.2

Subsequent Events

As previously discussed, on October 31, 2007, we announced the completion of a securitization of our closed block of individual income protection reserves through the issuance of \$800.0 million floating rate, insured, senior, secured notes by our wholly-owned subsidiary Northwind Holdings. The transaction also includes the intercompany reinsurance of \$11.1 billion of statutory reserves, representing approximately 95 percent of our Individual Income Protection – Closed Block segment, to Northwind Re. With the risk transfer to Northwind Re, our traditional U.S. insurance subsidiaries will be able to release excess statutory capital previously supporting this reinsured closed block business. The excess capital will be transferred to Unum Group from the ceding companies through extraordinary dividends, the payment of which has been approved by regulatory authorities in the applicable insurance companies' states of domicile.

The primary components of our capital redeployment plan include:

- Retaining sufficient capital in our traditional U.S. insurance subsidiaries to establish a weighted average RBC ratio of approximately 320 percent in the short-term, above our stated long-term objective of 300 percent.
- Reducing our corporate debt by \$800.0 million to establish a leverage ratio of approximately 25 percent. The debt reduction is expected to be completed in the second quarter of 2008 and includes the retirement of the \$150.0 million of senior notes which occurred in February 2007, a debt tender offer of up to \$400.0 million to be commenced in the fourth quarter of 2007, a fourth quarter of 2007 bond call of \$150.0 million, and other miscellaneous reductions totaling approximately \$100.0 million.
- Maintaining at least \$300.0 million in holding company liquidity, reflecting our goal of holding one times annual fixed charges and a capital cushion which will vary over time. For the nine months ended September 30, 2007, our interest expense was \$134.3 million and dividends to stockholders were \$78.2 million. The timing of subsidiary dividends, debt reduction, and stock repurchase, among other factors, will affect the amount of holding company liquidity. We expect that holding company liquidity will be

[Table of Contents](#)

approximately \$900.0 million at the end of 2007 and in the range of \$300.0 to \$400.0 million at the end of 2008.

- No change in our common stock dividend per share.

In addition, our board of directors has authorized the repurchase of up to \$700.0 million of Unum Group's common stock, which we anticipate initiating upon, and as subject to, completion of the debt reduction program. The share repurchase program does not have an expiration date, and the pace of repurchase activity, if commenced, will depend upon various factors such as the level of available cash, alternative uses for cash, and our stock price. The authorization may be modified, extended, or terminated by our board of directors at any time.

Ratings

A.M. Best Company (AM Best), Fitch Ratings (Fitch), Moody's Investors Service (Moody's), and Standard & Poor's Corporation (S&P) are among the third parties that rate our senior debt and the financial strength of our principal U.S. insurance subsidiaries. Financial strength ratings are primarily based on U.S. statutory financial information and are individually stated for each of the U.S. domiciled insurance companies. These ratings reflect each rating agency's view of the overall financial strength (capital levels, earnings, growth, investments, business mix, operating performance, and market position) of the insuring entity and also incorporate an assessment of each entity's ability to meet obligations to policyholders. Debt ratings represent the opinions of the rating agencies specific to an issuer's ability to repay its debt and are based primarily on consolidated financial information prepared using GAAP. Both financial strength ratings and debt ratings incorporate both quantitative and qualitative analyses by rating agencies and are routinely evaluated and updated on an ongoing basis.

We compete based in part on the financial strength ratings provided by rating agencies. A downgrade of our financial strength ratings could, among other things, adversely affect our relationships with distributors of our products and services and retention of our sales force; negatively impact persistency and new sales, particularly with respect to large case group sales and individual sales; and generally adversely affect our ability to compete. Downgrades in our debt ratings can be expected to adversely affect our cost of capital and our ability to raise additional capital.

The table below reflects our senior debt ratings and the financial strength ratings for our traditional insurance company subsidiaries as of the date of this filing.

	<u>AM Best</u>	<u>Fitch</u>	<u>Moody's</u>	<u>S&P</u>
Senior Debt Ratings	Bbb- (Good)	BBB- (Good)	Baa1 (Speculative)	BB+ (Speculative)
Financial Strength Ratings				
Provident Life and Accident	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	BBB+ (Good)
Provident Life and Casualty	A- (Excellent)	A- (Strong)	Not Rated	Not Rated
Unum Life of America	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	BBB+ (Good)
First Unum Life	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	BBB+ (Good)
Colonial Life & Accident	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	BBB+ (Good)
Paul Revere Life	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	BBB+ (Good)
Paul Revere Variable	A- (Excellent)	A- (Strong)	Baa1 (Adequate)	BBB+ (Good)
Unum Limited	A- (Excellent)	Not Rated	Not Rated	BBB+ (Good)

We maintain an ongoing dialogue with these four rating agencies in order to inform them of progress we are making regarding our strategic objectives and financial plans, as well as other pertinent issues. A significant component of our communications includes an annual review meeting, as well as other meetings not limited to quarterly updates regarding our business. During the second quarter of 2007, we conducted our annual review with Moody's, S&P, and Fitch. We plan to hold our annual review meeting with AM Best in the fourth quarter of 2007.

[Table of Contents](#)

On August 1, 2007, S&P raised the outlook from “stable” to “positive” on our financial strength ratings and reaffirmed the positive outlook on our holding company’s senior debt ratings. There have been no other changes in any of the rating agencies’ outlook statements or ratings during 2007.

Agency ratings are not directed toward the holders of our securities and are not recommendations to buy, sell, or hold our securities. Each rating is subject to revision or withdrawal at any time by the assigning rating organization, and each rating should be regarded as an independent assessment, not conditional on any other rating. Given the dynamic nature of the ratings process, changes by these or other rating agencies may or may not occur in the near-term. See our annual report on Form 10-K for the year ended December 31, 2006, for further information regarding our debt and financial strength ratings and the risks associated with rating changes.

Other Information

Pension and Postretirement Benefit Plans

We sponsor several defined benefit pension and postretirement plans for our employees, including non-qualified pension plans. The U.S. pension plans comprise the majority of our total benefit obligation and pension expense. The value of the benefit obligations is determined based on a set of economic and demographic assumptions that represent our best estimate of future expected experience. These assumptions are reviewed annually. Two of the economic assumptions, the discount rate and the long-term rate of return, are adjusted accordingly based on key external indices. We follow Statements of Financial Accounting Standards No. 87 (SFAS 87), *Employers’ Accounting for Pensions*, No. 106 (SFAS 106), *Employers’ Accounting for Postretirement Benefits Other Than Pensions*, No. 132 (SFAS 132), *Employers’ Disclosures about Pensions and Other Postretirement Benefits*, and No. 158 (SFAS 158), *Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)* in our financial reporting and accounting for our pension and postretirement benefit plans.

As a result of the sale of GENEX, we froze the pension plan benefits for the employees of GENEX during the first quarter of 2007, which resulted in a curtailment and a remeasurement of our U.S. pension plan obligation. The net effect of the curtailment and remeasurement was an increase in our pension plan liability of \$29.0 million, a decrease in deferred income tax of \$10.1 million, a decrease in income from discontinued operations of \$0.2 million, and a decrease in accumulated other comprehensive income of \$18.7 million.

See our annual report on Form 10-K for the year ended December 31, 2006, and Note 5 of the “Notes to Consolidated Financial Statements” contained herein in Item 1 for further information.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to various market risk exposures including interest rate risk and foreign exchange rate risk. With respect to our exposure to market risk, see the discussion under “Investments” in Item 2 of this Form 10-Q and in Part II, Item 7A of our annual report on Form 10-K for the year ended December 31, 2006. During the first nine months of 2007, there was no substantive change to our market risk or the management of this risk.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this quarterly report. Based on that evaluation, these officers concluded that our disclosure controls and procedures were effective as of September 30, 2007.

Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting, as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended, during the first nine months ended September 30, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

In the ordinary course of business, our internal control over financial reporting changes as we modify and enhance our processes and information technology systems to meet changing needs and increase our efficiency. Any significant changes in internal controls are evaluated prior to implementation to help maintain the continued effectiveness of our internal control. While changes have occurred in our internal controls during the first nine months ended September 30, 2007, there were no changes that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

ITEM 1. LEGAL PROCEEDINGS

Refer to Part I, Item 1, Note 9 of the “Notes to Consolidated Financial Statements” for information on legal proceedings.

ITEM 1A. RISK FACTORS

There have been no material changes from the risk factors disclosed in our annual report on Form 10-K for the year ended December 31, 2006.

ITEM 6. EXHIBITS

EXHIBIT 10.4
PERFORMANCE-BASED RESTRICTED STOCK UNIT AGREEMENT

THIS AGREEMENT, dated as of the [] day of [], 2007, between Unum Group, a Delaware corporation (the "Company"), and [] (the "Employee").

WITNESSETH

In consideration of the mutual promises and covenants made herein and the mutual benefits to be derived herefrom, the parties hereto agree as follows:

1. Grant, Vesting and Forfeiture of Restricted Stock Units.

(a) Grant. Subject to the provisions of this Agreement and to the provisions of the Unum Group Stock Incentive Plan of 2007 (the "Plan"), the Company hereby grants to the Employee, as of [] (the "Grant Date"), [] Restricted Stock Units (the "Restricted Stock Units"), each with respect to one share of common stock of the Company, par value \$0.10 per Share ("Common Stock"). All capitalized terms used herein, to the extent not defined, shall have the meaning set forth in the Plan.

(b) Vesting during the Restriction Period. Subject to the terms and conditions of this Agreement and the Employee's continued employment through the dates on which the Committee certifies that the Threshold Performance Goal (as defined on Exhibit A) and the Performance Goal (as defined on Exhibit A) are achieved during the applicable Performance Period (as defined on Exhibit A), the Employee shall vest in a number of shares as determined in accordance with Table 2 of Exhibit A based on Stock Price (as defined on Exhibit A) minus such number of shares as have previously vested under this Agreement with respect to a prior Performance Period (such period during which restrictions apply is the "Restriction Period").

(c) Forfeiture upon Termination of Employment; Accelerated Vesting upon Termination Due to Death, Disability, Retirement or Job Elimination. Upon the Employee's Termination of Employment for any reason other than due to the Employee's death, Disability, Retirement or termination by the Company by reason of a Job Elimination during a Restriction Period, all Restricted Stock Units still subject to restriction shall be forfeited. Upon the Employee's Termination of Employment during a Restriction Period due to the Employee's death, Disability or Retirement or by the Company by reason of a Job Elimination: (i) for any Performance Period that has ended as of the date on which the Termination of Employment occurs but pursuant to which Restricted Stock Units have not yet settled in accordance with Section 2 below, and subject to the achievement of the Threshold Performance Goals and the Performance Goals during such Performance Period, the Employee shall, at the time that the Restricted Stock Units for active employees of the Company generally are settled in accordance with Section 2 below, receive settlement of a number of Restricted Stock Units that the Employee would have received had the Employee remained employed through the date on which Restricted Stock Units are generally settled for such Performance Period, (ii) for the Performance Period that will end immediately following the date on which the Termination of Employment occurs, and subject to the achievement of the Threshold Performance Goal and Performance Goal during the applicable Performance Period, the Employee shall, at the time that the Restricted Stock Units of active employees of the Company generally are settled for such Performance Period in accordance with Section 2 below, vest and receive settlement of a number of Restricted Stock Units equal to the product of (A) (1) the excess, if any, of the number of Restricted Stock Units in which the Employee would vest for such Performance Period determined based on the Stock Price as if the Performance Period had ended as of the date of the Termination of Employment over (2) such number of shares as have already vested under this Agreement with respect to a prior Performance Period and (B) a fraction, the numerator of which is the number of full and partial months in the Pro Ration Period (as defined on Exhibit A) from the commencement of the Pro Ration Period until the date of Termination of Employment and the denominator of which is the total number of months in the Pro Ration Period and (iii) the opportunity of the Employee to vest in or receive settlement of any additional Restricted Stock Units with respect to any further Performance Periods shall terminate.

For purposes of this Agreement, "Retirement" shall mean the Employee's Termination of Employment after the attainment of age 65 or the attainment of age 55 and at least 15 years of continuous service, in each case, only if such Termination of Employment is approved as a "Retirement" by (x) the Committee in the case of an Employee who is subject to Section 16 of the Exchange Act or a "covered employee" within the meaning of Section 162(m) of the Code or (y) the Chief Executive Officer or Senior Vice President, Human Resources, in the case of all other

individuals. For purposes of this Agreement, employment with the Company shall include employment with the Company's Affiliates and its successors. For purposes of this Agreement, "Job Elimination" shall mean a termination by the Company by reason of an elimination of the position in which the Employee was serving as of immediately prior to such Termination of Employment.

Nothing in this Agreement or the Plan shall confer upon the Employee any right to continue in the employ of the Company or any of its Affiliates or interfere in any way with the right of the Company or any such Affiliates to terminate the Employee's employment at any time.

2. Settlement of Units.

Subject to Section 8 (pertaining to the withholding of taxes), as soon as practicable after a Restriction Period expires, but in no event later than March 15th of the year following the year in which the Restricted Stock Units are vested, the Company shall deliver to the Employee or his or her personal representative, in book-position or certificate form, one Share that does not bear any restrictive legend making reference to this Agreement for each Share subject to the Restricted Stock Unit.

3. Nontransferability of the Restricted Stock Units.

During the Restriction Period and until such time as the Restricted Stock Units are ultimately settled as provided in Section 2 above, the Restricted Stock Units and the Shares covered by the Restricted Stock Units shall not be transferable by the Employee by means of sale, assignment, exchange, encumbrance, pledge, hedge or otherwise. Any purported or attempted transfer of such Shares or such rights shall be null and void.

4. Rights as a Stockholder.

During the Restriction Period, the Employee shall not be entitled to any rights of a stockholder with respect to the Restricted Stock Units (including, without limitation, any voting rights), *provided* that with respect to any dividends paid on Shares underlying the Restricted Stock Units, such dividends will be reinvested into additional Restricted Stock Units, which shall vest at such time as the underlying Restricted Stock Units vest and be settled at such time.

5. Adjustment; Change in Control.

In the event of certain transactions during a Restricted Period, the Restricted Stock Units shall be subject to adjustment as provided in Section 3(d) of the Plan or any applicable successor provision under the Plan. Notwithstanding the provisions of Section 10(a) of the Plan or Section 1 of this Agreement to the contrary, in the event of a Change in Control, (a) the Threshold Performance Goal and Performance Goal with respect to any Performance Period that has not ended as of the date of the Change in Control shall be deemed to be achieved as of the date of the Change in Control and the Employee shall vest in a number of Restricted Stock Units determined based on the Stock Price as if the Performance Period had ended as of the date of the Change in Control, (b) fifty percent of the remaining Restricted Stock Units, if any, shall vest upon the earlier of (i) the Employee's Termination of Employment for any reason other than a termination (A) by the Company for Cause or (B) by the Employee without Good Reason and (ii) December 31, 2011 and (c) the remainder of the Restricted Stock Units, if any, shall be forfeited, provided that, in the event that the Restricted Stock Units are not assumed in connection with the Change in Control, the Employee shall vest in the Restricted Stock Units described in clauses (a) and (b) above immediately prior to the Change in Control.

For purposes of this Agreement, "Good Reason" (1) shall have the meaning set forth in the Employee's applicable employment or change in control severance or change in control employment agreement or plan as in effect on the date hereof or (2) if the Employee is not party to such an agreement or does not participate in such a plan or if such an agreement or plan does not define Good Reason, shall mean a material diminution in annual base salary or annual target bonus as in effect immediately prior to a Change in Control other than an isolated, insubstantial and inadvertent action not taken in bad faith, but only in the absence of a written consent by the Employee, and only if the Employee provides notice to the Company of the existence of the condition constituting Good Reason within a period not to exceed 90 days of the initial existence of the condition and the Company fails to remedy the condition within 30 days of such notice.

6. Payment of Transfer Taxes, Fees and Other Expenses.

The Company agrees to pay any and all original issue taxes and stock transfer taxes that may be imposed on the issuance of shares received by an Employee in connection with the Restricted Stock Units, together with any and all other fees and expenses necessarily incurred by the Company in connection therewith.

7. Other Restrictions.

(a) The Restricted Stock Units shall be subject to the requirement that, if at any time the Committee shall determine that (i) the listing, registration or qualification of the Shares subject or related thereto upon any securities exchange or under any state or federal law is required, or (ii) the consent or approval of any government regulatory body is required, then in any such event, the grant of Restricted Stock Units shall not be effective unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The Employee acknowledges that the Employee is subject to the Company's policies regarding compliance with securities laws. If the Employee is a Restricted Person under the Company's Insider Trading Policy (as in effect from time to time and any successor policies), the Employee shall be required to obtain pre-clearance from the General Counsel or Securities Counsel of the Company prior to purchasing or selling any of the Company's securities, including any shares issued upon vesting of the Restricted Stock Units, and may be prohibited from selling such shares other than during an open trading window. The Employee further acknowledges that, in its discretion, the Company may prohibit the Employee from selling such shares even during an open trading window if the Company has concerns over the potential for insider trading.

8. Taxes and Withholding.

No later than the date as of which an amount first becomes includible in the gross income of the Employee for federal, state, local, foreign income, employment or other tax purposes with respect to any Restricted Stock Units, the Employee shall pay to the Company, or make arrangements satisfactory to the Company regarding the payment of, all federal, state, local and foreign taxes that are required by applicable laws and regulations to be withheld with respect to such amount. The obligations of the Company under this Agreement shall be conditioned on compliance by the Employee with this Section 8, and the Company shall, to the extent permitted by law, have the right to deduct any such taxes from any payment otherwise due to the Employee, including deducting such amount from the delivery of shares upon settlement of the Restricted Stock Units that gives rise to the withholding requirement.

9. Notices.

All notices and other communications under this Agreement shall be in writing and shall be given by hand delivery to the other party or by facsimile, overnight courier, or registered or certified mail, return receipt requested, postage prepaid, addressed as follows:

If to the Employee:

At the most recent address
on file at the Company.

If to the Company:

Unum Group
1 Fountain Square
Chattanooga, Tennessee 37402
Attention: Executive Compensation, Human Resources

or to such other address or facsimile number as any party shall have furnished to the other in writing in accordance with this Section 9. Notices and communications shall be effective when actually received by the addressee. Notwithstanding the foregoing, the Employee consents to electronic delivery of documents required to be delivered by the Company under the securities laws.

10. Effect of Agreement.

This Agreement is personal to the Employee and, without the prior written consent of the Company, shall not be assignable by the Employee otherwise than by will or the laws of descent and distribution. This Agreement shall inure to the benefit of and be enforceable by the Employee's legal representatives. This Agreement shall inure to the benefit of and be binding upon the Company and its successors and assigns.

11. Laws Applicable to Construction: Consent to Jurisdiction.

The interpretation, performance and enforcement of this Agreement shall be governed by the laws of the State of Delaware without reference to principles of conflict of laws, as applied to contracts executed in and performed wholly within the State of Delaware. In addition to the terms and conditions set forth in this Agreement, the Restricted Stock Units are subject to the terms and conditions of the Plan, which is hereby incorporated by reference.

12. Severability.

The invalidity or enforceability of any provision of this Agreement shall not affect the validity or enforceability of any other provision of this Agreement.

13. Conflicts and Interpretation.

Unless the provisions of the Plan are expressly overridden in a specific reference to the applicable Plan provision, in the event of any conflict between this Agreement and the Plan, the Plan shall control. In the event of any ambiguity in this Agreement, or any matters as to which this Agreement is silent, the Plan shall govern including, without limitation, the provisions thereof pursuant to which the Committee has the power, among others, to (a) interpret the Plan, (b) prescribe, amend and rescind rules and regulations relating to the Plan, and (c) make all other determinations deemed necessary or advisable for the administration of the Plan. The Employee hereby acknowledges that a copy of the Plan has been made available to him and agrees to be bound by all the terms and provisions thereof. The Employee and the Company each acknowledges that this Agreement (together with the Plan) constitutes the entire agreement and supersedes all other agreements and understandings, both written and oral, among the parties or either of them, with respect to the subject matter hereof.

14. Amendment.

The Company may modify, amend or waive the terms of the Restricted Stock Unit award, prospectively or retroactively, but no such modification, amendment or waiver shall materially impair the rights of the Employee without his or her consent, except as required by applicable law, stock exchange rules, tax rules or accounting rules. The waiver by either party of compliance with any provision of this Agreement shall not operate or be construed as a waiver of any other provision of this Agreement, or of any subsequent breach by such party of a provision of this Agreement.

15. Section 409A.

It is the intention that the Restricted Stock Units do not constitute "deferred compensation" within the meaning of Section 409A of the Code, and it is the intention and belief of the Company that the provisions of this Agreement comply in all respects with Section 409A of the Code. If the Company determines after the Grant Date that an amendment to this Agreement is necessary to ensure the foregoing, it may, notwithstanding Section 14, make such amendment, effective as of the Grant Date or any later date, without the consent of the Employee.

16. Headings.

The headings of Sections herein are included solely for convenience of reference and shall not affect the meaning or interpretation of any of the provisions of this Agreement.

17. Counterparts.

This Agreement may be executed in counterparts, which together shall constitute one and the same original.

18. Waiver and Release.

In consideration for the granting of the Restricted Stock Units, the Employee hereby waives any and all claims whether known or unknown that the Employee may have against the Company and its affiliates and their respective directors, officers, stockholders, agents or employees arising out of, in connection with or related to the Employee's employment, except for (1) claims under this Agreement, (2) claims that arise after the date hereof and obligations that by their terms are to be performed after the date hereof, (3) claims for compensation or benefits under any compensation or benefit plan or arrangement of the Company and its affiliates, (4) claims for indemnification respecting acts or omissions in connection with the Employee's service as a director, officer or employee of the Company or its affiliates, (5) claims for insurance coverage under directors' and officers' liability insurance policies maintained by the Company or its affiliates, or (6) any right the Employee may have to obtain contribution in the event of the entry of judgment against the Company as a result of any act or failure to act for which both the Employee and the Company or any of its affiliates are jointly responsible. The Employee waives any and all rights under the laws of any state (expressly including but not limited to Section 1542 of the California Civil Code), which is substantially similar in wording or effect as follows:

“A general release does not extend to claims which the creditor does not know or suspect to exist in his favor at the time of executing the Release, which if known by him must have materially affected his settlement with the debtor.”

This waiver specifically includes all claims under the Age Discrimination in Employment Act of 1967, as amended. The Employee (a) acknowledges that he has been advised to consult an attorney in connection with entering into this Agreement; (b) has twenty-one (21) days to consider this waiver and release; and (c) may revoke this waiver and release within seven (7) days of execution upon written notice to Legal Counsel, Employment and Labor, Law Department, Unum Group, One Fountain Square, Chattanooga, Tennessee 37402. The waiver and release will not become enforceable until the expiration of the seven (7) day period. In the event that the waiver and release is revoked during such seven (7) day period, the grant shall be void and of no further effect.

IN WITNESS WHEREOF, as of the date first above written, the Company has caused this Agreement to be executed on its behalf by a duly authorized officer and the Employee has hereunto set the Employee's hand.

EXHIBIT 31.1
CERTIFICATION

I, Thomas R. Watjen, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Unum Group;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
